Form ADV Part 2A Brochure

This Form ADV Part 2A brochure provides information about the qualifications and business practices of Compak Asset Management, Inc. If you have any questions about the contents of this brochure or would like to a current version of this brochure without charge, please contact us at 800-388-9700 or investments@compak.com. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority. Additional information about Compak Asset Management, Inc. also is available on the SEC's Investment Adviser Public Disclosure website at www.adviserinfo.sec.gov. Compak Asset Management, Inc. is a registered investment advisor. Registration as an investment advisor does not imply any certain level of skill or training.

Material Changes (Item 2)

This section of the brochure helps you quickly identify material changes from the last annual update.

This brochure describes important details about us, the services we provide, and includes information that was not in our previous brochure. Since our last annual updating amendment on March 31, 2025, we have made the following material changes:

Compak has updated its financial planning fee structure. The fee for a stand-alone standard financial plan has changed from a fixed fee of \$3,000 to a range of \$3,000 to \$7,500, depending on the complexity of the client's financial situation. In addition, Compak revised its financial planning hourly fee from a fixed rate of \$300 per hour to a range of \$300 to \$500 per hour, based on the nature and complexity of the services provided (Item 5).

Compak has ended its Custodial Support Services Agreement (CSSA) with Fidelity as of March 2026, and will no longer receive compensation from Fidelity for providing custodial support services. This change does not affect client fees or their ability to continue using Fidelity as a custodian (Item 5).

Compak has revised its advisory practices to allow the firm to engage third-party sub-advisers to manage a portion of assets in certain client accounts (Items 4 & 5). These sub-advisers may be engaged to implement specialized investment strategies, including direct indexing strategies (Items 4 & 8).

Advisory Business (Item 4)

This section of the brochure tells you about our business, including ownership, and a description of the services we offer.

Compak Asset Management, Inc. is referred to in this document as “Compak Asset Management,” “Compak,” “the Company,” “us,” “we,” or “our.” In this document we refer to current and prospective clients of Compak Asset Management as “you,” “client,” or “your.” Compak Asset Management is a California corporation formed in 1999 and is owned by its principals, Moez Ansari and Feroz Ansari. Compak Asset Management is headquartered in Newport Beach, CA and has an office located in Scottsdale, AZ.

Arizona Office:
8865 E. Bell Road, Suite 201
Scottsdale, AZ 85260
Phone: 800-388-9700

Types of Advisory Services

Investment Supervisory Services

Compak Asset Management, through its investment committee, provides asset management services on a continuous and ongoing basis guided by the individual needs of the client. Clients receiving this service will enter into a written Investment Advisory Agreement describing the service and detailing the applicable fees. Using the information provided by you, our investment advice is tailored to your individual situation. We regularly inquire about, and you are responsible for providing, information about your investment goals, time horizon, and risk tolerance. These investment supervisory services are generally not provided to all your holdings or net worth but rather only to assets specifically designated by you and agreed to by us as managed assets. Investment Advisory clients are offered Financial Planning services with no additional fees.

We generally offer our investment supervisory services to clients who place assets with a value of at least \$150,000 under our management. In a managed account, we select from different asset allocation models to manage your assets in accordance with your goals, objectives, and instructions. We may accept accounts smaller than \$150,000 at our sole discretion.

Retirement Investors

When Compak recommends that you rollover retirement assets or transfer existing retirement assets (such as a 401(k) or an IRA) to our management, Compak has a conflict of interest. This is because Compak will generally earn additional revenue when Compak manages more assets. In making the recommendation, however, Compak does so only after determining that the recommendation is in your best interest. As a registered investment adviser, we have a fiduciary obligation to all of our clients. If you are a “Retirement Investor,” this section also applies. “Retirement Investor” is defined as (1) a participant or beneficiary of a Plan with authority to direct the investment of assets in his or her account or to take a distribution, (2) the beneficial owner of an IRA acting on behalf of the IRA, or

(3) a fiduciary of a Plan or an IRA. A "Plan" is defined as any employee benefit plan described in ERISA section 3(3) and any plan described in Internal Revenue Code section 4975(e)(1)(A). An IRA is defined as any plan that is an account or annuity described in the other parts of section 4975(e)(1): Paragraphs 4975(e)(1)(B) through (F). Compak acknowledges we are a "fiduciary" under ERISA or the Internal Revenue Code, or both, with respect to our investment advisory recommendations and discretionary asset management services provided to Retirement Investors under the investment management agreement.

Satisfaction Guarantee

New clients entering into a managed account agreement with us will be provided a satisfaction guarantee for the first twelve (12) months from the date of signing a management agreement with us. Our satisfaction guarantee provides that during the first twelve (12) months from the date of opening your account, you will be permitted to obtain a refund of all management and maintenance fees paid to us for any reason, including but not limited to, dissatisfaction with our: (i) financial planning, (ii) investment performance, (iii) back office operations or (iv) frequency of communications concerning your account. You need not give any reason or justification for a refund request. Simply put, if you are not satisfied during the first twelve (12) months of our business relationship, Compak will refund all management and maintenance fees you have paid to us within thirty (30) days of any such request. The refund can be provided as a credit to your account, or a check paid directly to you. In the case of qualified accounts, a refund will be provided through a check paid directly to you. Additional details on refunds that will be made under the Satisfaction Guarantee appear in item 5, below.

This satisfaction guarantee does not and cannot provide any assurances about account performance, as all investing involves some degree of risk and we are unable to guarantee any level of success. For those clients who do request a refund of management and maintenance fees we anticipate it will be their preference to move their account to another investment adviser of his or her choice. If the request for a refund of management and maintenance fees relates to other than investment performance, Compak reserves the right in some instances to discuss the possibility of remaining a client under our fee structure set forth herein. Under all circumstances there will be no termination fees paid by a client due to the exercise of a satisfaction guarantee. Compak also reserves the right to terminate its satisfaction guarantee program on thirty (30) days' written notice. All clients eligible for the satisfaction guarantee at the time of termination of the satisfaction guarantee program will be provided the full twelve (12) month decision period for electing a refund of management fees.

For purposes of the satisfaction guarantee we consider a new client to be any person or entity that has never maintained an account with us and who places assets with us to manage, the source of which originates from other than a current Compak account. We do not consider group retirement plan participants as having a direct relationship with us and thus any such plan participants who open a new account with us will be eligible for our satisfaction guarantee.

Because we provide a twelve month "Satisfaction Guarantee" to new clients where we will refund our fees if a new client is dissatisfied for any reason with our services, we have a financial incentive to assure clients are satisfied with our services for the first twelve months. This satisfaction guarantee relating only to new clients in the first twelve months creates an incentive to favor a new client over an existing client should a situation arise where a product, service, or opportunity cannot be provided to all of our clients simultaneously. We recognize this conflict and strive to treat all of our clients equally.

Financial Planning

Clients who enter into an Investment Advisory agreement are offered financial planning services and financial plans at no additional cost. Some clients (who are not Investment Advisory clients) are provided with a written financial plan, subject to a separate agreement or engagement letter and the payment of financial planning fees. If you receive a written plan, it makes an attempt to provide you with an estimate of future growth in your net-worth and income. All tax sensitive reports are provided to you as estimates of future income and estate tax liabilities. These tax sensitive reports are based on current federal and applicable state laws regarding taxation. Federal and State Tax Laws are subject to change and interpretation. All reports, financial statement projections, tax liability estimates, and analysis are intended exclusively for your use in developing and implementing your financial plan. In view of this limited purpose, un-audited data is collected and used to produce your financial plan, therefore, any report, financial statement or analysis is to be considered un-audited as well. Accordingly, you should understand that such financial statements cannot be used as a representation of wealth, to obtain credit, or for any other purpose, other than developing a financial plan. The assumptions used in the financial plan are based on information provided and/or reviewed by the client. Any inaccurate information provided by the client of any facts or assumptions (income, expenses, asset values, etc.) used in the financial plan will make the results and our recommendations inaccurate. Compak Asset Management will not audit (examine), review or compile such statements and accordingly, Compak Asset Management will not express an opinion or other form of assurance on these financial statements, including the reasonableness of assumptions and other data on which any financial statements or projections are based.

There will be differences between projected estimates and the actual results of a financial plan, because events and circumstances frequently do not occur as expected. Investment returns in particular are most volatile and the probability of estimates coming close to actual results decline with a reduction in the investment-holding period. Compak Asset Management does not in any way represent or infer that the investment returns will be similar to estimates projected in your financial plan. The estimates are based on historical returns and Compak's analysis of the various asset classes, and the past performance of these asset classes does not guarantee that future results of these asset classes or your investments will be similar. Compak Asset Management uses a proactive investment strategy; therefore, the actual returns of your portfolio will differ from the financial plan projections. The financial plan is highly dependent on certain economic assumptions about the future. Therefore, the client should establish familiarity with historical data regarding key capital market assumptions such as inflation and investment rates of return, as well as,

an understanding of how significantly these assumptions affect the results of our analyses. We will not express any assurance as to the accuracy or reasonableness of your specific data and your assumptions. As your fiduciary, we will attempt to use reasonable assumptions if we prepare a financial plan for you. The financial plan assumptions and reports are primarily a tool to alert clients to certain possibilities. The reports are not intended to, nor do they provide any guaranty about future events including an individual's investment returns. The implementation of the plan is solely your responsibility.

The financial plans provided for some of our clients do not address all potential aspects of financial planning. Typically, our plans address retirement planning, college funding, and estate planning. Risk management issues such as life, health, disability, and long-term care insurance are not always addressed in every financial plan, and you are encouraged to ask specifically about these issues. Our financial plans are not intended to, nor should they be considered to be advice about law or your legal rights and responsibilities, accounting or tax planning, the avoidance of tax penalties or interest or preparation of your tax return. You are encouraged to seek competent legal and tax advice before implementing any recommendation made in a written financial plan prepared by us.

Types of Investments Used

We consider many different types of securities when formulating the investment advice we give to you. If you come to us with existing investments, we evaluate them with respect to your financial goals, risk tolerance, and investment time horizon. Depending upon your situation, your account(s) managed by us might contain mutual funds, individual stocks, corporate and/or government bonds, or exchange traded funds ("ETFs"), options, alternative investments, and structured notes. Recommendations of structured notes will be on a Non-Discretionary basis and will require client approval before any transaction (purchase or sale) will be made. In some situations, we might recommend that insurance and/or limited options strategies, be part of your investment portfolio. Depending on the clients' overall portfolio and financial goals, we might recommend alternative investments through 3rd party managers for clients who meet suitability guidelines (e.g. "accredited investor" or "qualified purchaser") which include factors such as risk tolerance, goals, objectives, net worth, and available investable assets. Alternative investments and structured notes generally involve additional risks including limited liquidity, higher fees, lack of transparency, valuation risk, and the potential for loss of principal. These investments may not be appropriate for all clients.

Third-Party Sub-Advisers / Separately Managed Accounts

We may recommend that clients allocate a portion of their assets to third-party investment advisers ("Sub-Advisers") through separately managed account ("SMA") programs or other investment management platforms. These Sub-Advisers are independent investment advisory firms that provide discretionary portfolio management services based on specific investment strategies. In these arrangements, the Sub-Adviser is typically granted discretionary authority to manage the client's account, including making decisions regarding the purchase and sale of securities, consistent with the client's investment objectives, risk tolerance, and any applicable investment guidelines.

Our firm is responsible for recommending the Sub-Adviser to the client, assisting with the selection of the appropriate strategy, and conducting initial and ongoing due diligence on the Sub-Adviser. We also monitor the Sub-Adviser's performance and continued appropriateness for the client's portfolio as part of our advisory services.

Clients are generally required to enter into a separate agreement with the Sub-Adviser and/or the program sponsor that authorizes the Sub-Adviser to provide discretionary investment management services. Clients should carefully review the Sub-Adviser's Form ADV Part 2A brochure and other disclosure documents for additional information regarding the Sub-Adviser's services, fees, investment strategies, and potential conflicts of interest.

Clients may terminate their relationship with our firm or the Sub-Adviser in accordance with the terms of the applicable advisory agreements. Our firm does not control the day-to-day investment decisions made by the Sub-Adviser but will monitor the Sub-Adviser's management of the account and may recommend changes if we believe doing so is in the client's best interest.

Direct Indexing Strategies

We may recommend or implement direct indexing strategies through separately managed account ("SMA") programs. Direct indexing seeks to replicate the performance of a market index (such as a broad equity index) by purchasing individual securities that comprise the index in a client's SMA.

Unlike index mutual funds or exchange-traded funds (ETFs), direct indexing allows for customization of the portfolio to reflect the client's investment preferences, restrictions on specific securities or industries, and tax considerations, including potential tax-loss harvesting.

Tailored Services and Investment Restrictions

We attempt to tailor your investment portfolio to your situation as you have described it to us. This is why it is so important that you let us know about changes to your financial situation, goals, or investment time horizon. You may impose restrictions on investing in certain securities or types of securities. You must clearly identify these restrictions in writing to us.

Electronic Communications & Digital Delivery Practices

Compak may communicate with clients through a variety of electronic means, including email, secure client portals, video conferencing platforms, and other digital communication channels. Electronic communications may be used to deliver advisory recommendations, account information, disclosures, reports, and other materials. While we take reasonable steps to secure electronic communications, including the use of encryption and secure transmission platforms where appropriate, electronic communications inherently involve risks such as interception, misdirection, delayed or failed delivery, or unauthorized access.

Clients should not assume that electronic communications have been received or reviewed unless we specifically acknowledge receipt. We recommend that clients refrain from sending sensitive personal or financial information via unencrypted email and promptly notify us of any changes to their email addresses or other electronic contact information. Clients may request paper copies of any electronically delivered documents at no additional charge.

Assets Under Management

As of December 31, 2025, Compak Asset Management manages approximately \$1,494,984,036 of client assets, on a discretionary basis, and approximately \$21,939,740 on a non-discretionary basis. Regulatory assets under management are calculated in accordance with SEC Form ADV instructions.

Fees and Compensation (Item 5)

This section of the brochure describes how we are compensated for the services we offer.

Compensation Methodology and Rates

Assets Under Management

For our investment supervisory services, we charge our clients an account management fee and an account maintenance fee. All fees are charged quarterly in advance, based on the custodian's value of securities and account data sent to Compak Asset Management on the last business day of the quarter. Your specific annual fee arrangement will be described in the written Investment Advisory Agreement entered into between you and Compak Asset Management. Investment advisory fees and account maintenance fees charged by us are negotiable at our sole discretion. All clients do not pay the same fee. A lower fee for a comparable service may be available from other sources. Compak and some of its Investment Advisor Representatives receive compensation based on the level of assets placed with them. When we charge asset-based fees, the more assets we manage, the more you'll pay in management fees. We therefore have financial incentive to encourage you to increase the amount of assets we manage for you.

Account Maintenance Fee

You will be charged an Account Maintenance Fee of \$45 per calendar quarter for each of your accounts under our management with a value greater than \$10,000. The Account Maintenance Fee is assessed in advance at the beginning of each calendar quarter. **We may waive this fee at our discretion.**

We will collect **management and account maintenance** fee by debiting the fee directly from your account. In the event that the Investment Management Agreement is terminated during the calendar quarter, we will provide a *pro rata* refund of the fee to you. We reserve the right, in our sole judgment, to redeem mutual funds or sell securities using our discretionary authority in order to collect our fees.

Account Management Fee

You will be assessed a tiered Account Management Fee in advance for the forthcoming calendar quarter based upon the value of your account assets under management. A matrix of our fee calculation follows:

Market Value of Account Assets	Quarterly Asset-Based Fees
\$0 to \$500,000	0.50%
\$500,001 to \$1,000,000	0.375%
\$1,000,001 to \$2,500,000	0.25%
\$2,500,001 to \$5,000,000	0.1875%
\$5,000,001 and above	0.15%

As an example, a Standard Account with \$3,000,000 under management at the end of a calendar quarter will be charged an Account Management Fee of 0.50% of the first \$500,000 under management, 0.375% of the next \$500,000 under management, 0.25% of the next \$1,500,000 under management and 0.1875% of the final \$500,000 under management. Our fees are negotiable, and all clients do not pay the same fee rates. Compak may offer reduced management fees at its discretion.

Clients that are referred to us through Fidelity Wealth Advisor Solutions® (the “WAS Program”) are billed using a different fee schedule than the one shown above. Refer to Item 14 of this document for a full description of the WAS Program. WAS Program clients will pay a quarterly rate of 0.25% on all assets below \$2,500,000. Accounts valued at greater than \$2,500,000 will use the fee schedule shown above or as agreed to in the client’s written agreement with us.

If you make additional deposits or withdrawals from your account(s) during the quarter, Compak Asset Management may, but is not obligated to, prorate the Account Management Fee with respect to such deposits or withdrawals.

Because advisory fees are billed quarterly in advance, clients should be aware that fees will be deducted before services for the billing period are fully performed. Upon termination of the advisory agreement, any prepaid but unearned fees will be refunded on a prorated basis. If the management agreement does not span the entire quarterly billing period, the fee will be pro-rated based on the number of days the account is open during the billing period. Your account custodian will send you account statements, at least quarterly, showing all disbursements for your account including the amount of the advisory fee, if deducted directly from the account. It is the shared responsibility of Compak Asset Management and you to verify the accuracy of the fee calculation as the account custodian will not determine whether the fee has been properly calculated. See Brokerage Practices (Item 12) in this brochure for more information about your account custodian(s).

Either you or we may terminate the Investment Advisory Agreement with thirty (30) days written notice. Any unearned asset management fees collected in advance of services being

performed will be returned to you on a *pro rata* basis. Compak may waive the 30 days notification requirements of the client at its discretion.

Structured notes or 3rd party alternative investments recommended by Compak will not be charged commissions by Compak. These notes will be included in the Market Value of Account Assets and your account will be assessed the management fee discussed under "Account Management Fee". Compak or its representatives do not receive any compensation for structured notes or alternative investment transactions other than the account management fee. Advisory fees charged by 3rd party managers are separate and apart from Compak's management fee. Clients may be required to sign an agreement directly with the recommended 3rd party alternative investment manager(s). In such cases Clients may be able to terminate their advisory relationship with the 3rd party manager according to the terms of their agreement with the 3rd party manager. Clients should review each 3rd party manager's alternative investment subscription documents for specific information on how they may terminate their advisory relationship with the 3rd party manager and how they may receive a refund, if applicable.

Any refund of fees to clients eligible for the satisfaction guarantee (discussed in item 4) will include a refund of the account maintenance fees and the account management fees paid to Compak. Fees excluded from the satisfaction guarantee are those which are typically charged by third parties for transactions on your behalf such as the custodian that holds the assets in your account, fees imposed on purchases of annuities and insurance products and redemption fees imposed by mutual funds, alternative investments, and or a custodian should you elect to redeem any such investment. Fees charged by the custodian for account closure are also excluded the satisfaction guarantee.

Financial Plan Fee and Hourly Fee (stand-alone)

We may perform "stand-alone" services such as financial planning for new clients who have not entered into an Investment Advisory Agreement with Compak, where the price of a standard financial plan may range from \$3,000 to \$7,500 depending on complexity. This plan may include a review of the client's financial situation, along with a limited scope analysis of the client's investment portfolio and recommendations regarding asset allocation and investment strategies. These services are limited to the preparation and presentation of the plan. Unless the client subsequently enters into a separate Investment Advisory Agreement, we do not implement the recommendations or provide ongoing investment advice or portfolio monitoring.

Our stand-alone financial planning services are limited to the preparation and presentation of recommendations. Unless the client enters into a separate Investment Advisory Agreement with our firm, we will not be responsible for the implementation of the financial plan or any investment recommendations. In addition, any investment advice provided as part of the stand-alone financial plan is limited to the time the plan is delivered and discussed with the client. Such advice does not constitute ongoing monitoring, management, or continuous investment advice.

Clients may request services beyond the standard financial plan, such as plan updates, revisions, or specialized analyses. These additional services are billed based on an agreed upon fixed amount, which depends on the complexity of the requested service and the experience and expertise of the personnel required to complete the work.

Any services other than the standard financial plan is based upon an agreed amount and time to complete the service. The rate per hour and amount of time of completion depends upon the level of complexity of the service and experience and expertise of the personnel used to do the work. Our hourly rate may range from \$300 to \$500 per hour and is negotiable according to the type of services provided.

Third-Party Sub-Advisers / Separately Managed Accounts Fees

In certain SMA or sub-advisory arrangements, the client pays a single advisory fee that covers both our advisory services and the services provided by the Sub-Adviser. The Sub-Adviser typically receives a portion of this fee for its portfolio management services. The specific fee arrangement will be disclosed to the client prior to or at the time the account is established. Clients should be aware that the total advisory fee paid in these arrangements may be higher than if the client were to engage the Sub-Adviser directly.

Advisory fees for SMA-based direct indexing strategies may include both our advisory fee and fees payable to the SMA platform or sub-adviser. The total fee will be disclosed to the client prior to account opening. Clients should be aware that fees for SMA-based direct indexing may be higher than for index mutual funds or ETFs due to portfolio customization, trading, and tax management services.

The fee is typically calculated quarterly in arrears based on the average daily market value of the assets in the account for that quarter. The Sub-Advisor, not Compak, instructs the custodian to deduct the sub-advisory fee directly from the client's account, and the custodian remits the fee directly to the Sub-Advisor. Typically, if an account is opened or closed during a quarter, the fee is prorated for the number of days the account was managed.

Clients may also incur custodian or brokerage transaction costs, as applicable, and any internal expenses of ETFs or mutual funds held in the account, which are separate from the sub-advisory fee. If a Sub-Advisor invests a client's assets in Sub-Advisor affiliated funds, Sub-Advisor will either credit affiliated fund fees against the sub-advisory fee or exclude those assets from the fee calculation, depending on the strategy and fund type.

Valuation of Publicly Traded Securities

Publicly traded securities in your account(s) managed by us are held at the custodian. We use the securities valuation provided by the independent qualified custodian for reporting and billing purposes. The custodian directly discloses its valuations methods to its clients, and we will use the value provided by your account custodian for securities held in your account. The account value will include accrued interest, dividends, and capital gain

distributions that have been declared and payable to you but not yet received on the valuation date. Our fee calculation will use the value of individual securities positions rounded to the nearest cent. (\$0.01). The rounding of multiple positions within a single account might in some cases result in an aggregate market value that is higher than shown on the custodian statement. This higher aggregate market value of the assets held in the account will result in a fee that is higher than would be the case had the exact amount of your individual securities been used. We will use the valuation methodologies used by the broker-dealer that is acting as custodian for your account.

Valuation of Private Equities / Alternative Investments

Where appropriate, Compak recommends to clients structured notes and 3rd party alternative investments in certain situations. These privately issued securities are valued by the issuer and valuation data is sent directly to the custodian, typically Fidelity InstitutionalSM ("Fidelity") which provides clearing, custody, or other brokerages services to Compak through National Financial Services LLC ("NFS"), or Fidelity Brokerage Services LLC, Members NYSE, SIPC. We do not independently value the structured notes or alternative investments held in your account(s).

Some of our clients might hold privately issued securities in their Fidelity accounts. These privately issued securities are not publicly traded and therefore do not have a daily indication of their fair market value. It is Fidelity's policy to use the last known transaction price to value these non-publicly traded securities for reporting and billing purposes. Because the last known transaction price for these securities may be from a date far in the past, it may be higher or lower than the actual fair value of the securities at the portfolio valuation date. We do not independently value any securities held in your account(s).

How Clients Pay Advisory Fees

Fees are generally deducted directly from your account. You must provide your qualified account custodian with written authorization (Custodian Application) to have fees deducted from your account and paid to us.

Other Types of Fees and Expenses

In addition to the investment advisory fees you pay to us, you will pay transaction fees (commissions) to your custodian or broker-dealer for executing some securities transactions. You will also incur charges for special services elected by you or Compak. Compak does not share in these fees. Broker-dealers and custodians are required to disclose their fees to you. These fees may include:

- periodic distribution fees
- electronic fund and wire transfer fees
- certificate delivery fees
- reorganization fees
- account transfer fees (outbound)
- returned check fees
- international security transfer fees

- overnight mail and check fees
- Rule 144 transfer fees
- transfer agent fees

This list is not meant to be all inclusive. Any fee on a special service incurred by the client will be fully disclosed. Please refer to Item 12 of this document for an explanation of our brokerage practices. We strive to purchase load-waived or non-transaction fee mutual funds and ETFs but there will be instances that require you to pay additional fees and commissions.

Investment Company Fees

Investment company funds (e.g., mutual funds, ETFs, including alternative investments we may recommend) that are held by you will bear their own internal transaction and execution costs, as well as directly compensate their investment managers along with internal administrative services. Some funds pay 12b-1 fees, distribution fees, and/or shareholder service fees to broker-dealers that offer investment company funds to their clients. These fees affect the net asset value of the fund shares and are indirectly borne by fund shareholders such as you. Neither Compak nor its affiliates receive 12b-1 fees.

Some fund companies have imposed a redemption fee. A redemption fee is another type of fee that some funds charge their shareholders when shares are sold or redeemed within a short period of time from the purchase of the fund shares. Although a redemption fee is deducted from redemption proceeds just like a deferred sales load, it is not considered to be a sales load. Unlike a sales load, which is generally used to compensate brokers, a redemption fee is typically used to defray fund costs associated with a shareholder's redemption and is paid directly to the fund, not to a broker or Compak. The SEC generally limits redemption fees to 2%. In most cases, the funds will use the "first-in, first-out" (FIFO) method to determine the holding period. Under this method, the date of the redemption will be compared with the earliest purchase date of shares held in the account. While it is not our general practice to sell client securities in a period that would generate a redemption fee, we might do so if we believe the sale is in your best interests, or if fund shares must be redeemed to pay fees from the account.

A complete explanation of these charges is contained in the Prospectus and Statement of Additional Information for each investment company fund. You can get a prospectus through the investment company website, by telephone, or by mail.

Commission Based Compensation

Some Investment Advisor Representatives of Compak Asset Management while acting as a Registered Representative of our affiliated broker-dealer (Compak Securities, Inc.) will receive trailing sales commissions from insurance companies and product sponsors in connection with your decision to invest in variable annuities. The amounts of these commissions vary between investment choices. The receipt of the commissions creates a financial incentive for the Investment Advisor Representatives to recommend one investment choice over another. This incentive creates a conflict of interest between you

and Compak Asset Management where the Investment Advisor Representative has an incentive to recommend investment products based on the compensation received, rather than on your needs. You acknowledge that the Investment Advisor Representatives and Compak Asset Management will receive such revenue in addition to any investment advisory or financial planning fee(s) paid by you if you choose to implement an investment recommendation through a Compak Representative. To address these conflicts, we review the costs and expenses associated with investments selected for or recommended to you to assure that the costs incurred are reasonable with respect to the services provided.

Compak will not charge an investment advisory fee on investments that generated a sales commission that was paid to Compak or Compak Securities, Inc. The value of an investment that originally generated a sales commission paid to Compak or Compak Securities, Inc. will not be included in the value of your account(s) for quarterly investment advisor fee billing purposes by Compak Asset Management.

You have the option to purchase investment or insurance products that Compak Asset Management might recommend through other brokers or agents not affiliated with us.

Additional Compensation

The owners of Compak Asset Management and some of its Investment Advisor Representatives are also licensed as insurance agents. During the course of providing services to a client, they may recommend that you purchase, sell or hold an insurance product. Our Investment Advisor Representatives, when acting as insurance agents, will receive compensation usually based upon the size (premium amount) and/or type of insurance product when you choose to implement an insurance recommendation through our representative. The receipt of the fees and commissions creates a financial incentive for the Investment Advisor Representatives to recommend one investment choice or insurance product over another. This incentive creates a conflict of interest between you and Compak Asset Management where the Investment Advisor Representative has an incentive to recommend investment products based on the compensation received, rather than on your needs. You acknowledge that the Investment Advisor Representative and Compak Asset Management will receive payment in addition to any investment advisory or financial planning fee(s) paid by you when you choose to implement an insurance recommendation through our representative. To address these conflicts, we review the costs and expenses associated with investments selected for, or recommended to you to assure that the costs incurred are reasonable with respect to the services provided. Compak will not charge an investment advisory fee on insurance products that generated a sales commission that was paid to Compak or Compak Securities, Inc. The value of an insurance product that originally generated a sales commission paid to Compak will not be included in the value of your account(s) for quarterly investment advisor fee billing purposes by Compak Asset Management.

Performance-Based Fees and Side-By-Side Management (Item 6)

This section of the brochure explains any performance-based fees we may charge you for and how they may be different from other clients' charges.

Performance-Based Fees

We don't charge an investment advisory fee that is directly based on the gains in your account (performance-based fees). We provide investment advisory services to other clients in addition to you. Not all clients receive the same investment advice, nor do they pay the same fee. We will act in the best interests of each of our clients at all times.

Types of Clients (Item 7)

This section of the brochure describes who we generally provide our services to.

We generally offer our investment supervisory services to clients who place assets with a value of at least \$150,000 under our management. We believe that \$150,000 is the minimum account value that can best take advantage of the full range of our analytical strategies. At our discretion we may accept or retain accounts smaller than the stated minimum.

Individuals

Compak Asset Management provides advisory services to a variety of types of clients including individuals, trusts, individual's retirement plan accounts, and retirement plan trustees.

Retirement Plans

Compak Asset Management provides advisory services to 401(k), profit sharing, and defined benefit plans. These services include recommendations to the plan which are then approved by the retirement plan sponsor. In some cases, we will serve as a discretionary advisor to the plan or plan participants. You are encouraged to ask your plan sponsor what services we are providing the plan.

Methods of Analysis, Investment Strategies, and Risk of Loss (Item 8)

This section of the brochure explains how we formulate our investment advice and manage client assets.

Methods of Analysis

In accounts that use Compak's Mutual Funds & ETFs Strategies, Compak uses the strategy of "Asset Allocation" on behalf of our clients. We believe that by allocating assets among various classes of investments, we can enhance or optimize your investment returns,

especially when compared to a portfolio that consists only of one asset class. Our investment strategies attempt to find a balance between risk and return for our clients using historical performance of each asset class as a guide. Compak uses tactical strategies, fundamental and technical analyses, and information obtained from you to develop the investment strategy that we believe will provide you with the **a level of** potential return consistent with your risk tolerance. The asset allocation or make up of the client portfolio will change from time to time depending upon the stock market, overall economy, and the decisions of Compak Asset Management. These techniques use historical information in an attempt to draw conclusions about the future performance of investments. There is a risk that past performance will not be indicative of the future, and that our conclusions about historical data will be flawed or based on incorrect selection of data points. Compak also uses 3rd party research (JP Morgan and Goldman Sachs) in its analysis.

Fundamental

We analyze an investment by examining its publicly available financial statements or reports, its management, competitive advantages, competitors, and markets. We attempt to identify investments that are selling, in our opinion, for less than their intrinsic worth. Our fundamental analysis method is based upon the assumption that markets may misprice an investment in the short run but that the “correct” price will eventually be reached. An obvious risk of this is that our judgment of “correct,” will not be supported by actual market performance.

Technical

As part of our analysis of investments, we use a method called Technical Analysis. Technical Analysis is a security analysis method with the goal of forecasting the direction of prices of securities or market indexes, through the study of past market data, primarily price and volume. We use market indicators to help assess whether an asset’s price is trending in a particular direction, and if it is, the probability of its direction and of continuation. We also use research materials prepared by others. There is no guarantee that past performance will accurately predict future performance. Similarly, a risk of technical analysis is that over-focus on historical patterns could lead us to ignore or downplay security-specific concerns, overall market or sector concerns, or other factors, because we assume inaccurately the historical patterns will repeat themselves.

Investment Strategies

Compak Customized Portfolio Strategy

Compak manages some client portfolios using a strategy it calls the Compak Customized Portfolio Strategy. We only recommend this strategy to clients that we feel it is suitable for. Clients that choose to have us use this strategy will direct us in writing, normally in the written investment advisory agreement or addendum. There are two broad types of portfolios that use this strategy, the “Growth Portfolio Strategy” and the “Dividend Income Portfolio Strategy.” In addition to the general risks described below, the Compak Customized Portfolio Strategy has several specific risks. Because the Compak Customized Portfolio Strategy will hold individual equities, undiversified Exchange Traded Funds (ETFs), and individual fixed income investments, the portfolios may not be as diversified as other Compak investment strategies. We expect that the Growth Portfolio and the Dividend

Income Portfolio will be more volatile than the general stock market and other Compak investment strategies. The Compak Customized Portfolio Strategy will be periodically rebalanced or reallocated and these changes in the portfolio will generate trading commissions and costs that the client will incur. Compak might raise a significant amount of cash in these portfolios as a risk management strategy, and accounts will continue to be charged advisory fees on that cash. The trading costs associated with the Compak Customized Portfolio Strategy might be higher than other Compak strategies. Compak also uses 3rd party research (JP Morgan and Goldman Sachs) in its analysis.

Growth 100 – Compak Customized Portfolio Strategy

The “**Growth 100 Portfolio**” will use a combination of individual equity securities, mutual funds, exchange traded funds (ETFs) and cash. The “Growth 100 Portfolio” will use the S&P 500 as its benchmark and expects the portfolio’s volatility to be greater than the benchmark. The “Growth 100 Portfolio” strategy’s goal is to provide capital appreciation. This strategy is only appropriate for investors with a “**Very Aggressive**” risk profile. In an attempt to outperform the benchmark on risk and return basis, the firm invests in asset classes and sectors that may not be included in the benchmark. It should be anticipated that this strategy will have significant volatility (positive and negative price changes) and there is a risk that investors may lose investment principal. The strategy may invest in foreign investments that bring the risk of changes in the relative value of currencies. The strategy’s portfolio allocation between different investment types and asset classes will vary over time because of differences in the performance of individual investments and allocation decisions made by Compak’s Investment Committee.

Growth 80-20 – Compak Customized Portfolio Strategy

The “**Growth 80-20 Portfolio**” will use a combination of individual equity securities, bonds, mutual funds, exchange traded funds (ETFs) and cash. The “Growth 80-20” will use a blended benchmark made up of 80% weighting to the S&P 500 and 20% to the Bloomberg U.S. Aggregate Bond Index. The “Growth 80-20 Portfolio” strategy’s goal is to provide capital appreciation and some income. In an attempt to outperform the benchmark on risk and return basis, the firm invests in asset classes and sectors that may not be included in the benchmark. This strategy might be appropriate for investors with a “**Aggressive**” risk profile. The “Growth 80-20 Portfolio” will normally have an asset mix of investments that are expected to have a lower level of risk or volatility, than the “Growth 100 Portfolio”. It should be anticipated that this strategy will have volatility (positive and negative price changes) and there is a risk that investors may lose investment principal. The strategy may invest in foreign investments that bring the risk of changes in the relative value of currencies. The strategy’s portfolio allocation between different investment types and asset classes will vary over time because of differences in the performance of individual investments and allocation decisions made by Compak’s Investment Committee.

Growth 60-40 – Compak Customized Portfolio Strategy

The “**Growth 60-40 Portfolio**” will use a combination of individual equity securities, bonds, mutual funds, exchange traded funds (ETFs) and cash. The “Growth 60-40 Portfolio” will use a blended benchmark made up of 60% weighting to the S&P 500 and 40% to the Bloomberg U.S. Aggregate Bond Index. The “Growth 60-40 Portfolio” strategy’s

goal is to provide capital appreciation and some income. In an attempt to outperform the benchmark on risk and return basis, the firm invests in asset classes and sectors that may not be included in the benchmark. This strategy might be appropriate for investors with a **Moderate** risk profile. The "Growth Equity 60-40" will normally have an asset mix of investments that are expected to have a lower level of risk or volatility, than the "Growth 100 and Growth 80-20 Portfolios". It should be anticipated that this strategy will have volatility (positive and negative price changes) and there is a risk that investors may lose investment principal. The strategy may invest in foreign investments that bring the risk of changes in the relative value of currencies. The strategy's portfolio allocation between different investment types and asset classes will vary over time because of differences in the performance of individual investments and allocation decisions made by Compak's Investment Committee.

Dividend Income 100 – Compak Customized Portfolio Strategy

The **Dividend Income 100 Portfolio** will use a combination of individual equity securities, mutual funds, exchange traded funds (ETFs) and cash. The "Dividend Income 100 Portfolio" will use the S&P 500 as its benchmark and expects the portfolio's volatility to be greater than the benchmark. The "Dividend Income 100 Portfolio" Strategy's goal is to provide capital appreciation and some dividend income. This strategy is only appropriate for investors with a **Very Aggressive** risk profile. In an attempt to outperform the benchmark on risk and return basis, the firm invests in asset classes and sectors that may not be included in the benchmark. It should be anticipated that this strategy will have significant volatility (positive and negative price changes) and there is a risk that investors may lose investment principal. The strategy may invest in foreign investments that bring the risk of changes in the relative value of currencies. The strategy's portfolio allocation between different investment types and asset classes will vary over time because of differences in the performance of individual investments and allocation decisions made by Compak's Investment Committee.

Dividend Income 80-20 – Compak Customized Portfolio Strategy

The **Dividend Income 80-20 Portfolio** will use a combination of individual equity securities, mutual funds, exchange traded funds (ETFs) and cash. The "Dividend Income 80-20 Portfolio" will use a blended benchmark made up of 80% weighting of the S&P 500 and 20% to the Bloomberg U.S. Aggregate Bond Index as its benchmark and expects the portfolio's volatility to be greater than the benchmark. The "Dividend Income 80-20 Portfolio" strategy's goal is to provide capital appreciation and some dividend income. The "Dividend Income 80-20 Portfolio" will normally have an asset mix of investments that are expected to have a lower level of risk or volatility, than the "Dividend Income 100 Portfolio". This strategy is only appropriate for investors with a **Aggressive** risk profile. In an attempt to outperform the benchmark on risk and return basis, the firm invests in asset classes and sectors that may not be included in the benchmark. It should be anticipated that this strategy will have significant volatility (positive and negative price changes) and there is a risk that investors may lose investment principal. The strategy's portfolio allocation between different investment types and asset classes will vary over time because of differences in the performance of individual investments and allocation decisions made by Compak's Investment Committee.

Dividend Income 60-40 – Compak Customized Portfolio Strategy

The “**Dividend Income 60-40 Portfolio**” will use a combination of individual equity securities, mutual funds, exchange traded funds (ETFs) and cash. The “Dividend Income 60-40 Portfolio” will use a blended benchmark made up of 60% weighting of the S&P 500 and 40% to the Bloomberg U.S. Aggregate Bond Index as its benchmark and expects the portfolio’s volatility to be greater than the benchmark. The “Dividend Income 60-40 Portfolio” strategy’s goal is to provide capital appreciation and some dividend income. The “Dividend Income 60-40 Portfolio” will normally have an asset mix of investments that are expected to have a lower level of risk or volatility, than the “Dividend Income 100 & Dividend Income 80-20 Portfolios”. This strategy is only appropriate for investors with a “**Moderate**” risk profile. In an attempt to outperform the benchmark on risk and return basis, the firm invests in asset classes and sectors that may not be included in the benchmark. It should be anticipated that this strategy will have significant volatility (positive and negative price changes) and there is a risk that investors may lose investment principal. The strategy’s portfolio allocation between different investment types and asset classes will vary over time because of differences in the performance of individual investments and allocation decisions made by Compak’s Investment Committee.

Dividend Income 40-60 – Compak Customized Portfolio Strategy

The “**Dividend Income 40-60 Portfolio**” will use a combination of individual equity securities, mutual funds, exchange traded funds (ETFs) and cash. The “Dividend Equity Portfolio” will use a blended benchmark made up of 40% weighting of the S&P 500 and 60% to the Bloomberg U.S. Aggregate Bond Index as its benchmark and expects the portfolio’s volatility to be greater than the benchmark. The “Dividend Income 40-60 Portfolio” strategy’s goal is to provide capital appreciation and some dividend income. The “Dividend Income 40-60 Portfolio” will normally have an asset mix of investments that are expected to have a lower level of risk or volatility, than the “Dividend Income 100, Dividend Income 80-20, and Dividend 60-40 Portfolios”. This strategy is only appropriate for investors with a “**Conservative**” risk profile. In an attempt to outperform the benchmark on risk and return basis, the firm invests in asset classes and sectors that may not be included in the benchmark. It should be anticipated that this strategy will have significant volatility (positive and negative price changes) and there is a risk that investors may lose investment principal. The strategy’s portfolio allocation between different investment types and asset classes will vary over time because of differences in the performance of individual investments and allocation decisions made by Compak’s Investment Committee.

S&P 500

Compak Mutual Funds & ETFs Portfolios

Compak manages some client portfolios using a strategy it calls the Compak Mutual Funds & ETFs Portfolio Strategy. There are four broad strategies which include; Very Aggressive Strategy, Aggressive Strategy, Moderate Strategy and Conservative Strategy. Though Compak primarily invests in mutual funds and ETFs, we may also invest client assets in equity and debt securities. Based on market expectation, Compak may keep a significant portion of assets in cash. We attempt to generate higher returns than the benchmark at lower volatility.

In arriving at our targeted asset allocation, we consider a variety of quantitative and qualitative data with respect to U.S. and foreign economies and securities markets.

Unless you specifically impose written restrictions, we are not required to maintain any minimum or maximum investment in any asset class, and we may at times invest more than 25% of your portfolio's assets in an asset class. We will periodically adjust the targeted asset allocation.

Very Aggressive Strategy – Mutual Funds & ETFs Portfolios

The Very Aggressive Strategy is a general strategy that will vary on client situation (e.g., Account Registration or Account Type) and the recommendations of the Investment Committee. This strategy will primarily be invested in Mutual Funds, ETFs, and Cash. The "Very Aggressive" investment strategy will normally have asset mixes that have significant volatility in their value or risk, and may provide higher potential returns, with a corresponding greater uncertainty and potential for loss of principal. The benchmark for the "Very Aggressive Strategy" is the S&P 500. The portfolio's goal is to generate higher returns than the benchmark while experiencing lower volatility. In an attempt to outperform the benchmark on risk and return basis, the firm invests in asset classes and sectors that may not be included in the benchmark. Only investors who have a "Very Aggressive" level of risk tolerance and are willing to accept a substantial amount of market risk and volatility (loss of principal) for the pursuit of potentially high investment returns should select this investment goal. Compak may raise a significant amount of cash in these portfolios as a risk management strategy.

Aggressive Strategy– Mutual Funds & ETFs Portfolios

The Aggressive Strategy is a general strategy that will vary on client situation (e.g., Account Registration or Account Type) and the recommendations of the Investment Committee. This strategy will primarily be invested in Mutual Funds, ETFs, and Cash. The "Aggressive" investment strategy will normally have asset mixes that are designed to produce more volatility in their value or risk, and may provide higher potential returns, with a corresponding greater uncertainty and potential for loss of principal. The benchmark for the "Aggressive Strategy" is composed of 80% S&P 500 and 20% Bloomberg U.S. Aggregate Bond Index. This portfolio's goal is to generate higher returns than the benchmark while experiencing lower volatility. In the attempt to outperform the benchmark on risk and return basis, the firm invests in asset classes and sectors that may not be included in the benchmark. Investors who have an "Aggressive" level of risk tolerance are willing to accept a substantial amount of market risk and volatility (loss of principal) for the pursuit of potentially high investment returns. Compak may raise a significant amount of cash in these portfolios as a risk management strategy.

Moderate Strategy– Mutual Funds & ETFs Portfolios

The Moderate Strategy is a general strategy that will vary on client situation (e.g., Account Registration or Account Type) and the recommendations of the Investment Committee. This strategy will primarily be invested in Mutual Funds, ETFs, and Cash. The "Moderate" investment strategy focuses on reducing risk or the volatility of the value of the portfolio.

Investors who have a moderate level of risk tolerance are willing to accept relatively lower portfolio returns in exchange for lower market risk and volatility. The benchmark for the Moderate Strategy is composed of 70% S&P 500 and 30% Bloomberg U.S. Aggregate Bond Index. The goal of the Moderate Strategy is to attempt to generate higher returns than the benchmark while experiencing lower volatility. In an attempt to outperform the benchmark on risk and return basis, the firm invests in asset classes and sectors that may not be included in the benchmark. A “Moderate” investment goal portfolio is anticipated to have a lower potential for long-term gains and losses than an “Aggressive” or “Very Aggressive” portfolio and more potential for long-term gains and losses than a “Conservative” portfolio. There is still the risk of loss of principal with a Moderate investment goal. Compak may raise a significant amount of cash in these portfolios as a risk management strategy.

Conservative Strategy– Mutual Funds & ETFs Portfolios

The Conservative Strategy is a general strategy that will vary on client situation (e.g., Account Registration or Account Type) and the recommendations of the Investment Committee. This strategy will primarily be invested in Mutual Funds, ETFs, and Cash. The “Conservative” investment strategy will normally have an asset mix of investments that are expected to have a lower level of risk or volatility, than the “Very Aggressive”, “Aggressive” or “Moderate” portfolios. The benchmark for the “Conservative Strategy” is composed of 60% S&P 500 and 40% Bloomberg U.S. Aggregate Bond Index. The goal of the “Conservative Strategy” is to generate higher returns than the benchmark at lower volatility. In an attempt to outperform the benchmark on risk and return basis, the firm invests in asset classes and sectors that may not be included in the benchmark. Conservative investors are willing to accept relatively low investment returns in return for a reduced amount of risk and volatility. There is still the risk of loss of principal with a Conservative investment goal. Compak may raise a significant amount of cash in these portfolios as a risk management strategy.

Special Situation Accounts

Compak may create specific portfolios that are customized to a client’s specific request or direction and are classified as Special Situations. These requests may include restrictions of certain investments based on type, sector, company, or religious/moral beliefs (alcohol producing companies, gambling companies, etc.). These accounts may also deviate from the client’s risk profile due to current or future financial goals (expected large expense, liquidity, concentrated stock positions, etc.). Compak will discuss each client’s preferences and will endeavor to develop a portfolio strategy that is in line with their moral/religious beliefs or special current/future financial goal as they have described them to Compak. All Special Situation accounts might not be diversified because of restrictions placed by the client and the unique risk based on the client’s specific goals. This type of account may have significantly higher risk and volatility due to the lack of diversification (i.e., client might restrict the use fixed income, diversified ETFs and mutual funds which may significantly affect the portfolio’s allocation). Special Situation Accounts will deviate from Compak Customized Portfolio Strategy and Compak Mutual Funds & ETFs Portfolios models.

Compak Asset Management uses 3rd party research (e.g. S&P Indices) to determine the client's directed investment universe. Special Situations clients have the right to restrict or exclude investment recommendations from the investment universe. Client may also request to add securities to their portfolio that are not based on a 3rd party investment universe. These positions may not be in line with the 3rd party investment universe but are requested by the client.

Individual investors have specific beliefs about what is acceptable; Compak does not guarantee that any of these strategies will always align with an investor's themes or beliefs. Compak does not endorse, recommend, or promote, any type of religious or moral beliefs. Compak does not independently verify statements made by the companies or funds we select for inclusion (or that clients request for inclusion) in Special Situation portfolios, including statements made about compliance with religious principles or avoidance of specific sectors or types of income. At any given time, all/some portions of your account will use or hold a core position (cash or money market fund) for processing cash/account transactions (buying/selling securities, checks, wires, and other account disbursements) and for holding uninvested cash. These positions are interest paying securities and may not be in line with some beliefs but are required to maintain an account with the custodian.

Commodities

exposure may be gained through use of commodity-based ETFs and mutual funds. These include both actively-managed and passive commodity funds. These commodity funds could represent a single commodity (e.g., gold), commodity sector (e.g., metals), or diversified funds investing in all commodities. Commodity funds include ETFs that target widely-used commodity indices such as the Goldman Sachs Commodity Index or the Dow Jones – AGI Commodity index.

Structured Notes

Based on the risk appetite, liquidity needs of clients, and client's net worth, Compak may present Structured Notes to selected clients for consideration. Compak believes that these notes will have limited liquidity and among other risks, the credit risk of the issuer is an important consideration. These notes can provide clients with appropriate investment horizon (holding period) a viable investment opportunity with certain risk management features (hard buffer or principal protections etc.). Before investing in structured notes, clients will be provided a prospectus from the issuer which should be carefully reviewed before investing. Compak and its representatives do not receive any transaction-based compensation for structured notes transactions. We do, though, charge our standard advisory fees on the value of the assets.

Alternative Investments

Compak believes that alternative investment strategies can add valuable diversification benefits to portfolios that cannot be obtained through investments in only stocks and bonds. Based on the client's overall asset allocation, concentrated portfolio holdings, risk appetite, liquidity needs of clients, net worth, and client's tax situation, Compak may present 3rd party alternative investments selected clients for consideration. Our clients are

under absolutely no obligation to consider or make an investment in alternative investment(s).

Some of the factors when considering alternative investments include investment strategy, manager track record, and fund fee structure. Alternative investments are financial assets that do not fall into one of the conventional investment categories (e.g., stocks, bonds, cash) and may include venture capital, private equity, private credit, private real estate. An example of an alternative investment would be an “exchange fund” for investment diversification with concentrated stock positions.

An “exchange fund”, is a 3rd party private investment fund designed for long-term investors with concentrated stock positions to diversify their portfolio and potential tax benefits. Examples of 3rd party firms that currently issue exchange funds, include, but not limited to, Eaton Vance and Goldman Sachs.

To invest in some alternative investments, investors may be required to qualify as a “accredited investor” or a “qualified purchaser”. They also typically have minimum investment requirements. The “accredited investor” requirement is generally met if the investor’s net worth is over \$1 million, excluding primary residence. The “qualified purchaser” requirement is generally met with the investor owns \$5 million or more in investments. The fund issuer may have other criteria for investors to participate. Offering documents such as a separate application, subscription agreement, private placement memorandum, or client documentation may be required from the issuer to transact in an alternative investment. Before investing, clients may be provided a prospectus or private placement memorandum from the issuer which should be carefully reviewed before investing. The client shall establish with offerings documents that he/she is qualified for investment in the alternative investment and acknowledges and accepts the various risk factors that are associated with such an investment.

Please review the prospectus, private placement memorandum, or offering documents, for all costs, fees and expenses that the issuer will receive directly. Compak and its representatives do not receive any transaction-based compensation for alternative investment transactions. We do, though, charge our standard advisory fees on the value of the assets.

Options Strategies

In a few accounts, Compak may use option strategies as a part of a client’s overall investment portfolio. These strategies may include covered calls writing, purchases of calls/puts, and purchases of straddles/combinations. The primary objective of these option strategies may be to generate income from a concentrated position or attempt to reduce downside risk on a specific security. Options may be used to establish a portfolio position in a particular securities or asset class.

Accounts that use options will complete a separate options agreement with the custodian/broker. The client should carefully read the associated risks on the broker option agreement and the book “Characteristics and Risks of Standardized Options,”

available from the Options Clearing Corporation (<https://www.theocc.com/>) before investing. Clients may also be required to enter into a margin agreement with the custodian/broker.

Options involve significant risks, and there is no guarantee that an options strategy will achieve the client's intended objectives. Portfolio performance may decline due to factors such as overall market conditions, the time sensitivity of options, pricing volatility, or the performance of the underlying security. In addition, options strategies may result in substantial losses, including losses greater than the amount invested in the option itself.

Account performance may decline with options strategies and might not achieve the goal of the client. Some factors that contribute to account performance are the overall market conditions, options' time frame, or the underlining company performance of the option. There are trading fees, commissions, and possible margin interest associated with options strategies which are not included in and are in addition to Compak's management fees. These trading costs are paid directly to the options broker. Trading costs will have a negative impact on the account's performance.

Tactical Asset Allocation

As part of our investment strategy, we adjust a portfolio's asset allocation. While we may not be successful, our goal in using Tactical Asset Allocation is to improve the risk-adjusted returns of an investment portfolio when compared with other investment strategies. We modify our asset allocation advice according to our opinion of the valuation of the markets in which our clients are invested. We attempt to adjust our asset allocation advice to overweight or focus on a market or sector of the market that we feel will perform better than others. We strive to buy investments with the goal of holding them as long-term investments, but we might recommend you sell a particular investment if, in our opinion, it is no longer in your best interest to hold. Based on our future expectations we will move in and out of certain sectors and may from time-to-time even keep a significant portion of your assets in cash. If our judgment is incorrect, any specific Tactical Asset Allocation change we make may lead to reduced rather than improved portfolio performance.

Investment Committee

Compak Asset Management provides investment supervisory services under the guidance and supervision of our Investment Committee ("IC") and through its various Investment Advisor Representatives. The IC, headed by Moez Ansari (CEO), is comprised by Feroz Ansari (Senior Principal & Portfolio Manager), Javaid Ansari (Executive Vice President), and Qinyi Du (Senior Financial Analyst). Each Investment Advisor Representative, when meeting with a prospective advisory client, will obtain information from the client concerning his or her financial and tax status, prior investment experience, risk tolerance, and financial objectives.

Investment Process

We may invest a substantial portion of client portfolios in investment companies including mutual funds and exchange traded funds or "ETFs". We might also invest client portfolios in equity securities, including those of small capitalization companies, investment grade

and high yield fixed-income securities with maturities ranging from 3 months to 30 years, currencies and commodity-related and real-estate related securities and derivative instruments (options, futures, and forward contracts) as well as cash. We may also pursue our investment objectives by investing directly in individual U.S. equities, foreign equities, U.S. government securities, domestic, foreign, and emerging market bonds when circumstances warrant. We might invest a client's entire portfolio in foreign securities, including emerging market securities. Compak might raise cash in clients' portfolios as a risk management strategy. We may engage in active trading, which might cause high portfolio turnover.

We consider a client's risk profile when making investment recommendations. Risk profile will be based upon an evaluation of your financial goals, objectives, and risk tolerance. Risk tolerance is usually measured using Compak's Investor Information: Client Profile & Investment Goal questionnaire. Compak might also utilize the third party Riskalyze software program to assist in determining the clients risk tolerance profile. For existing clients, a follow up risk assessment may be done if circumstances or their financial status changes. You should review this information occasionally and inform us, in writing, of any changes.

Risks

General Risks to Investing

Investing is not without risk, and involves the risk of loss of principal which you should be prepared to bear. We use several strategies to try to reduce risk, including (i) diversifying a portfolio across multiple asset classes; (ii) buying securities we believe are undervalued; (iii) closely monitoring the portfolio for changes in fundamentals; and (iv) using technical analysis, which emphasizes selling or establish positions in securities or asset classes.

Despite these strategies, historical evidence clearly shows that every asset class has experienced severe declines in value—sometimes sustained over many years—throughout several periods of time in history. In addition, each of our strategies to minimize risk may not achieve that goal as (i) the benefits of diversification decline if asset classes become more correlated; (ii) determining valuation depends on accurately forecasting outcomes that may ultimately differ with our projections; (iii) security prices can change materially when exchanges are closed due to company-specific news or changes in macroeconomic or geopolitical conditions; and (iv) following technical indicators could lead to frequent trading.

Frequent trading can affect investment performance several ways, including: (i) generating excessive trading commissions; (ii) experiencing holding periods of less than 12 months that lead to gains taxed at higher, earned income tax rates rather than at lower, capital gains tax rates, and (iii) limiting the ability of a security to record multiple years of compounding, which is an important element to achieving favorable long-term portfolio returns.

As with any investment, you could lose all or part of your investments managed by Compak Asset Management, and your account's performance could trail that of other investments.

Asset Class Risk

Securities in your portfolio(s) or in underlying investments such as mutual funds may underperform in comparison to the general securities markets or other asset classes.

Concentration Risk

To the extent that Compak Asset Management recommends portfolio allocations that are concentrated in a particular market, industry or asset class, your portfolio may be susceptible to loss due to adverse occurrences affecting that market, industry, or asset class.

Equity Securities Risk

Equity securities are subject to changes in value that may be attributable to market perception of a particular issuer or general stock market fluctuations that affect all issuers. Investments in equity securities are more volatile than some other types of investments.

Growth Securities Risk

Growth companies are companies whose earnings growth potential appears to be greater than the market, in general, and whose revenue growth is expected to continue over an extended period. Stocks of growth companies or "growth securities" have market values that are more volatile than those of some other types of investments. Growth securities typically do not pay a dividend.

Issuer Risk

Your account's performance depends on the performance of individual securities in which your account invests. Any issuer may perform poorly, causing the value of its securities to decline. Poor performance may be caused by poor management decisions, competitive pressures, changes in technology, disruptions in supply, labor problems or shortages, corporate restructurings, fraudulent disclosures, or other factors. Changes to the financial condition or credit rating of an issuer of those securities can cause the value of the securities to decline.

Management Risk

The performance of your account is subject to the risk that our investment management strategy might not produce the intended results.

Market Risk

Your account could lose money over short periods due to short-term market movements and over longer periods during market downturns. The value of a security may decline due to general market conditions, economic trends, or events that are not specifically related to the issuer of the security or to factors that affect a particular industry or industries. During a general downturn in the securities markets, you should expect that multiple asset classes will be negatively affected.

Market Trading Risks

Your investment account faces numerous market trading risks, including the potential lack of an active market for investments held in your account and losses from trading in secondary markets.

Passive Investment Risk

Compak Asset Management may use a passive investment strategy where we do not attempt to take defensive positions in declining markets.

Larger Company Securities Risk

Securities of companies with larger market capitalizations may underperform securities of companies with smaller and mid-sized market capitalizations in certain economic environments. Larger, more established companies might be unable to react as quickly to new competitive challenges, such as changes in technology and consumer tastes. Some larger companies may be unable to grow at rates higher than the fastest growing smaller companies, especially during extended periods of economic expansion.

Leverage Risk

Certain transactions give rise to a form of leveraging, including borrowing. Such transactions include, among others, reverse repurchase agreements, loans of portfolio securities, and the use of when-issued, delayed-delivery, or forward-commitment transactions. The use of derivatives usually also create leverage. The use of leverage might cause a portfolio to liquidate portfolio positions when it may not be advantageous to do so. Leveraging can also make a portfolio more volatile than if the portfolio had not been leveraged. This is because leverage tends to increase a portfolio's exposure to market risk, interest rate risk, or other risks by increasing assets available for investment. In addition, many leveraged and inverse funds & ETFs are reset daily, meaning they are designed to achieve their stated objectives on a daily basis. Compak does not currently plan to hold these types of investments unless directed by the client.

Liquidity Risk

Liquidity is the ability to readily convert an investment into cash. Generally, assets are more liquid if many traders are interested in a standardized product. For example, Treasury Bills are highly liquid, while real estate properties are not. Certain instruments may have no readily available market or third-party pricing. Some private placements, for example, have virtually no secondary market. Structured notes may trade in the secondary market but have few buyers and sellers and be highly dependent on the willingness of the sponsoring bank or dealer to redeem the notes prior to maturity. Reduced liquidity may have an adverse impact on market price and the ability to sell particular securities when necessary to meet cash needs or in response to a specific economic event, such as the deterioration of creditworthiness of an issuer, or broader events, such as the global pandemic or the 2008 mortgage crisis. Reduced liquidity in the secondary market for certain securities may also make it more difficult to obtain market quotations based on actual trades for the purpose of valuing the security. Clients should invest in illiquid (or relatively illiquid) assets only to the extent they have adequate other liquid assets available to fund current and ongoing cash requirements.

Smaller Company Securities Risk

Securities of companies with smaller market capitalizations, historically, tend to be more volatile and less liquid than larger company stocks. Smaller companies may have no or relatively short operating histories, or be newly public companies. Some of these companies have aggressive capital structures, including high debt levels, or are involved in rapidly growing or changing industries, or new technologies, which pose additional risks.

Value Style Investment Risk

Value stocks can perform differently from the market as a whole and from other types of stocks. Value stocks may be purchased based upon the belief that a given security may be out of favor. Value investing seeks to identify stocks that have depressed valuations, based upon a number of factors which are thought to be temporary in nature, and to sell them at superior profits when their prices rise when the issues which caused the valuation of the stock to be depressed are resolved. While certain value stocks may increase in value more quickly during periods of anticipated economic upturn, they may also lose value more quickly in periods of anticipated economic downturn. Furthermore, there is a risk that the factors which caused the depressed valuations are longer term or even permanent in nature, and that there will not be any rise in value. Finally, there is the increased risk that such companies may not have sufficient resources to continue as ongoing businesses, which can result in the stock of such companies becoming worthless.

Negatively Correlated Investment Risk

Negatively correlated investments are designed to perform in a manner opposite to that of a particular market index, on a given day (i.e., go up when the market index goes down). The investments do not guarantee any specific performance and may fail to achieve their goal. If these investments are held for more than one day, their performance will diverge from their goal because of internal factors. Compak does not plan to hold this type of investment unless directed by the client.

Leveraged Mutual Funds & ETFs

Leveraged mutual funds & ETFs seek to deliver multiples of performance of the index or benchmark they track. While the use of leverage can potentially help generate additional gains, it also increases the chances that returns will be significantly worse than the decline in the value of the underlying index or benchmark. In addition, the use of borrowing or other forms of leverage provides the potential for greater gains and losses than those of the underlying index. In addition, many leveraged and inverse funds & ETFs are reset daily, meaning they are designed to achieve their stated objectives on a daily basis. Compak does not currently plan to hold these types of investments unless directed by the client.

Negatively Correlated and Leveraged Funds & ETFs

Some funds are both negatively correlated and leveraged, which means that they seek to achieve a return that is a multiple of the opposite performance of the underlying index or benchmark. We consider these funds speculative and only use them as part of an actively managed portfolio strategy. In addition, many leveraged and inverse funds are reset daily, meaning they are designed to achieve their stated objectives on a daily basis. Due to the compounding of daily returns, leveraged and inverse funds' returns over periods other

than one day will likely differ in amount and possibly direction from the benchmark return for the same period. This means that if we choose to hold these leveraged negatively correlated funds in your portfolio for greater than one day their performance is expected to diverge from their daily performance goal. Compak does not currently plan to hold these types of investments unless directed by the client.

Interest Rate Risk

Changing interest rates can cause the value of fixed income securities and funds that hold these securities to decline in value. To the extent that your account is invested in fixed income securities, changing interest rates can cause the value of these investments to decline significantly.

Options Risk

Clients who utilize options must understand that options involve significant risks and are not suitable for all investors. Option strategies may result in the loss of some or all of the investment, and in certain cases, losses may exceed the amount initially invested. The value of options is affected by factors such as price movements in the underlying security, market volatility, interest rates, and the passage of time. Options may expire worthless, and the time sensitive nature of these instruments can magnify losses. Options transactions may also be adversely affected by market conditions, liquidity constraints, and the financial condition or performance of the underlying issuer.

Derivatives Risk

The use of derivatives such as futures, options, and swap agreements can lead to losses, including those magnified by leverage, particularly when derivatives are used to enhance return rather than offset risk.

Structured Notes Risk

Structured notes are unsecured debt obligations of the issuer, meaning that the issuer is obligated to make payments on the notes as promised and expose investors to credit risk. If the structured note issuer defaults on these obligations, investors may lose some, or all, of the principal amount they invested in the structured notes as well as any other payments that may be due on the structured notes.

Structured notes are complex instruments consisting of a debt component and an imbedded derivative. Structured notes that provide for the repayment of principal at maturity are subject to the credit risk of the issuing financial institution. Structured notes that do not offer this protection may cause investors to lose some, or all, of the principal. Depending on the nature of the linked asset or index, the market risk of the structured note may include changes in equity or commodity prices, changes in interest rates or foreign exchange rates, or market volatility.

After issuance, structured notes do not trade regularly and are difficult to value given their complexity. The ability to trade or sell structured notes in a secondary market is often very limited as structured notes (other than exchange-traded notes known as ETNs) are not listed for trading on security exchanges. Because they're illiquid, clients should be prepared

to hold a structured note to its maturity date, or risk selling the note at what could be a substantial discount to its value if held to maturity. The price of structured instruments may be more volatile than other debt securities. Structured notes may have complicated payoff structures that can make it difficult for clients to accurately assess their value, risk and potential for growth through the term of the structured note.

Determining the performance of each note can be complex and this calculation can vary significantly from note to note depending on the structure. Notes can be structured in a wide variety of ways. If a structured note has a “call provision” and the issuer “calls” the structured note, investors may not be able to reinvest their money at the same rate of return provided by the structured note that the issuer redeemed.

The tax treatment of structured notes is complicated and, in some cases, uncertain. The preliminary prospectus for the structured note will contain a tax summary describing what the issuer reasonably believes are the potential U.S. federal income tax consequences of investing in the investments, which is based on advice of their tax counsel. However, it is possible for the IRS to assert a different treatment than is described in the offering documents and for you to be negatively affected. Clients should carefully read the prospectus for a structured note to fully understand how the note is structured, tax risk disclosures, how the payoff on a note will be calculated, and discuss these issues with Compak and your outside tax advisor before investing.

Alternative Investment and Exchange Funds Risk

Alternative investments generally, involve various risk factors, including, but not limited to, potential for complete loss of principal, liquidity constraints, and lack of transparency. A complete discussion of which is set forth in each fund’s offering documents, which will be provided to each client for review and consideration. Unlike liquid investments that a client may maintain, alternative investments/private investments do not provide daily liquidity or pricing.

Alternative investments often have liquidity risk, where investors can only liquidate their funds at specified times, often after a lock-up period elapses. Liquidity risk can be an issue if one needs to convert their assets to cash immediately, and this risk generally becomes more prevalent when asset prices are precipitously declining. Further, investors may be unable to liquidate their entire position at one time, or the fund might prohibit redemptions indefinitely. Alternative investments have expenses that clients absorb. Alternative assets can also be subject to infrequent pricing, indicating the stated value is not equal to the value an investor would receive if the asset were liquidated. The risk of owning an alternative investment generally reflects the risks of owning the fund's underlying securities.

Assets in an exchange fund remain subject to stock market risk. Performance is expected to be correlated to broader equity markets. While diversification may reduce risk, it’s possible the diversified portfolio of stocks will underperform an investor’s original holding. Exchange funds are intended for long-term investors. Once an investor contributes a stock, there are typically restrictions on liquidity for seven years. While shares may generally be

redeemed daily or monthly, investors redeeming during those seven years are likely to first receive the original shares they contributed instead of a diversified basket of stocks. And early redemptions are subject to a redemption fee. There are fees and expenses associated with an exchange fund that are paid directly to the issuer.

Contributions to exchange funds are not taxable under current tax law, but legislation could change that. Also, corporate events may trigger taxable events. Any gains generated by the stock prior to the time it was contributed to the exchange fund ultimately will be applied in the future when the investor sells exchange fund positions. Exchange funds are a long-term, complex solution for investors with significant holdings that include an oversized position in equities. An exchange fund may not be the most appropriate choice for everyone. Tax treatment should be discussed with your outside tax advisor before investing. Other risk factors should be found in the issue's prospectus/private placement memorandum and should be reviewed before investing.

Direct Indexing Risk

Direct indexing involves constructing a portfolio of individual securities to approximate the performance of a target index. Because clients hold individual securities, the portfolio may experience greater tracking error, higher volatility, and company specific risk than a pooled index fund. Opportunities for tax loss harvesting are not guaranteed and may be limited by market conditions, client restrictions, related account activity, or wash sale rules. Direct indexing may also result in higher turnover and trading costs, which can negatively impact performance. As with any investment in securities, clients may lose some or all of their investment.

Direct indexing involves certain risks and limitations. Because the portfolio may not hold all securities in the index or may incorporate client-specific restrictions, its performance may differ from the referenced index ("tracking error").

Direct indexing may involve more frequent trading than traditional index funds or ETFs, potentially resulting in higher transaction costs. Tax-loss harvesting strategies may create wash sale rules or other tax consequences. Clients are responsible for consulting their tax professionals regarding these impacts.

While our firm monitors SMA accounts and the selected direct indexing strategies, the day-to-day investment decisions and trade execution are the responsibility of the SMA program or third-party sub-adviser.

Satisfaction Guarantee Risk

Because we provide a twelve month "Satisfaction Guarantee" to new clients where we will refund our fees if a new client is dissatisfied for any reason with our services, we have a financial incentive to assure clients are satisfied with our services for the first twelve months. This satisfaction guarantee relating only to new clients in the first twelve months creates an incentive to favor a new client over an existing client should a situation arise where a product, service, or opportunity cannot be provided to all of our clients simultaneously. We recognize this conflict and strive to treat all of our clients equally.

Disciplinary Information (Item 9)

This section of the brochure lists legal and disciplinary information for Compak Asset Management, its owners, and management team.

Neither Compak Asset Management nor any of our owners or management team members has been involved in any civil or criminal investment-related events that must be disclosed by SEC Registered Advisors in this document.

However, state regulators require that all formal investigations and disciplinary actions taken by regulators, customer disputes, certain criminal charges and/or convictions, as well as any Registered Representative's and Investment Advisor Representative's financial disclosures, such as bankruptcies and unpaid judgments or liens, be filed with FINRA. If this type of information would be material to your decision to do business with Compak Asset Management please refer to FINRA's Broker Check website (www.brokercheck.com) and with the Investment Adviser Public Disclosure website (www.adviserinfo.sec.gov) for more information about the Registered Representative and Investment Advisor Representative you are evaluating.

Some of Compak's financial professionals have legal or disciplinary history. Visit Investor.gov/CRS for a free and simple search tool to research our firm and our financial professionals.

Other Financial Industry Activities and Affiliations (Item 10)

This section of the brochure describes other financial services industry affiliations we have with any related person of Compak Asset Management that could present a conflict of interest with you.

We want you to know that Compak Asset Management is affiliated through common ownership and control with Compak Securities, Inc. This relationship might give rise to conflicts of interest, or the appearance of conflicts of interest.

Compak Securities, Inc.

Compak Securities Inc. is registered as a broker dealer with the United States Securities and Exchange Commission and the Financial Industry Regulatory Authority. We might recommend that clients purchase investment products such as variable annuities through our affiliate Compak Securities, Inc. Compak will not charge an investment advisory fee on investment products that generated a sales commission that was paid to Compak Securities, Inc. The value of an investment product that originally generated a sales commission paid to Compak Securities, Inc. will not be included in the value of your account(s) for quarterly investment advisor fee billing purposes by Compak Asset Management.

Compak Asset Management staff will from time to time recommend investments that might include variable annuities, fixed annuities, life insurance, long-term care insurance etc. Any investments or allocation made to these different investment products will only be made with your written approval. These other investments are not covered by the investment advisory agreement you enter into with us. Because these products are offered by our affiliates, you will not receive the same level of “fiduciary” care (unless mandated by another regulatory organization) as in the case of your investment advisory accounts with Compak Asset Management. Each of these investment products and our affiliated entities are regulated by a separate entity with specific rules and regulations. Our affiliated entity might not have a fiduciary relationship with you and because of their compensation might have material conflicts of interest with you.

Registered Representatives

Our Investment Advisor Representatives may also be Registered Representatives of our affiliated broker-dealer Compak Securities, Inc. As described in Item 5 (Commission Based Compensation), these Registered Representatives will receive commission-based income if you choose to implement securities transaction through these representatives and Compak Securities, Inc. Compak will not charge an investment advisory fee on securities that generated a sales commission that was paid to Compak Securities, Inc. The value of an insurance product that originally generated a sales commission paid to Compak will not be included in the value of your account(s) for quarterly investment advisor fee billing purposes by Compak Asset Management.

Insurance Agents

Compak’s Investment Advisor Representatives provide advice about matters other than securities. Some of our Investment Advisor Representatives also act as insurance agents. As insurance agents, they will receive compensation based upon whether or not, and in what amount, clients purchase insurance products through them. Compak will not charge an investment advisory fee on insurance products that generated a sales commission that was paid to Compak or Compak Securities, Inc. The value of an insurance product that originally generated a sales commission paid to Compak will not be included in the value of your account(s) for quarterly investment advisor fee billing purposes by Compak Asset Management. We have an arrangement with a non-affiliated insurance broker, CPS Insurance Services for insurance brokerage services, and will receive compensation based upon whether or not, and in what amount, clients purchase insurance products through them.

Referral Arrangements

Compak may maintain professional relationships with certain certified public accountants (“CPAs”), estate planning attorneys, and other professionals and may recommend their services to clients when appropriate.

We do not pay or receive referral fees, commissions, or any other form of compensation—directly or indirectly for making such recommendations.

Clients are under no obligation to engage any professional we recommend and are free to select any service provider of their choice. We do not supervise, monitor, or assume responsibility for the services provided by any third-party professional, and clients should perform their own due diligence before engaging any such provider.

Other Relationships

Compak Asset Management has relationship with entities for clients interested in retirement plan administration and ERISA consulting. We do not share any portion of investment advisory fees or commissions with these entities. Clients are not required to use the firms we recommend.

Code of Ethics, Participation or Interest in Client Transactions, and Personal Trading (Item 11)

This section of the brochure describes our code of ethics, adopted pursuant to SEC rule 204A-1, and how we deal with client and related person trading.

Code of Ethics

We have adopted a code of ethics designed to prevent and detect violations of securities rules by our employees and affiliated persons. Our controls in this area focus upon securities transactions made by our employees that have access to material information about the trading of Compak Asset Management. We will provide a copy of our code of ethics to clients or prospective clients upon request.

Material Financial Interest and Personal Trading

From time-to-time the interests of the principals and employees of Compak Asset Management might not coincide with yours and other clients. Individual securities may be bought, held, or sold by a principal or employee of Compak Asset Management that is also recommended to or held by you or another client. If potential insider information is inadvertently provided or learned by a principal or employee, it is our policy to strictly prohibit its use.

It is the policy of Compak Asset Management to permit the firm, its employees, and Investment Advisor Representatives to buy, sell, and hold the same securities that the Investment Advisor Representatives also recommend to clients. It is acknowledged and understood that we perform investment services for different types of clients with varying investment goals, risk profiles, and time horizons. As such, the investment advice offered to you can differ from other clients and investments made by our Investment Advisor Representatives. We have no obligation to recommend for purchase or sale a security that Compak Asset Management, its principals, affiliates, employees, or Investment Advisor Representatives may purchase, sell, or hold. When a decision is made to liquidate a security from all applicable accounts, priority will always be given to client orders before those of a related or associated person to Compak Asset Management. In some cases, the trades of the clients and advisory personnel will be combined in a single block trade, and all trades will

receive the average price. We have procedures for dealing with insider trading, employee-related accounts, “front running” and other issues that might present a conflict when buy/sell recommendations are made. These procedures include reviewing employee security transactions and holdings to eliminate, to the extent possible, the adverse effects of conflicts of interest on clients.

Brokerage Practices (Item 12)

This section of the brochure describes how we recommend broker-dealers for client transactions.

Factors Considered When Recommending Broker-Dealers

We require that clients use Fidelity as their qualified custodian and/or broker-dealer, unless client’s securities or investments cannot be custodied with Fidelity. When we make this recommendation, we consider:

- capitalization
- reasonableness of commissions and other costs of trading
- ability to facilitate trades
- access to client records
- computer trading support
- online account access technology
- other operational considerations

These factors are reviewed from time to time to assure the best interests of our clients are upheld. Upon special agreement we will provide portfolio management services to client accounts not held at Fidelity.

Fidelity Investments

Fidelity Investments is an independent company, unaffiliated with Compak. Fidelity Investments is a service provider to Compak. There is no form of legal partnership, agency affiliation, or similar relationship between your financial advisor and Fidelity Investments, nor is such a relationship created or implied by the information herein. Fidelity Investments has not been involved with the preparation of the content supplied by Compak and does not guarantee, or assume any responsibility for, its content. Fidelity Investments is a registered trademark of FMR LLC. Fidelity InstitutionalSM provides clearing, custody, or other brokerage services through National Financial Services LLC or Fidelity Brokerage Services LLC, Members NYSE, SIPC.

Research and Other Benefits

In most situations, we require that clients establish brokerage accounts with a specific custodian, Fidelity InstitutionalSM (“Fidelity”), which provides clearing, custody, or other brokerages services to Compak through National Financial Services LLC (NFS) or Fidelity Brokerage Services LLC, Members NYSE, SIPC., to maintain custody of clients’ assets and to

execute trades for your account(s). The Custodian provides us with access to its institutional trading and operations services, which are typically not available to retail investors. These services are offered to independent investment advisors at no charge in exchange for keeping a minimum amount of account assets at the Custodian. The Custodian's services include research, brokerage, and custody. The Custodian offers access to mutual funds and other investments that are available only to institutional investors or require a significantly higher minimum investment. The Custodian also makes other products and services available that benefit us but don't directly benefit our clients. Some of these other products and services help us manage and administer client accounts, and include software and other technology that:

- provide access to client account data (such as trade confirmations and account statements)
- facilitate trade execution (and allocation of aggregated trade orders for multiple client accounts)
- provide research, pricing information, and other market data
- facilitate payment of our fees from your account(s)
- help with back-office support, recordkeeping, and client reporting

These services are used with all or a substantial number of clients' accounts, including accounts not maintained at the Custodian. We do not attempt to allocate the benefit to accounts proportionately to the accounts that generate the benefit.

Some of the products or services provided by the Custodian do not qualify for the safe harbor in Section 28(e) of the Securities Exchange Act of 1934, including those services that do not aid in investment decision-making or trade execution. These business management and development services, in addition to those listed above, include consulting, publications and presentations on practice management, information technology, business succession, regulatory compliance, and marketing. In addition, the Custodian can use independent third parties to offer these services to Compak Asset Management. The Custodian sometimes discounts or waives fees it would otherwise charge for some of these business management and development services or pay all or a part of the fees of a third-party providing these services to us. Because we receive discounts, research, products, or services we have an incentive to select or recommend a broker-dealer based on our interest in receiving the research, products, or services, rather than on the client's interest in receiving most favorable execution. The Custodian or broker-dealer recommended by Compak Asset Management charges commissions (or markups or markdowns) that might be higher than those charged by other broker-dealers in return for services and benefits.

Directed Brokerage

If you direct Compak Asset Management to execute securities transactions at a broker-dealer other than the one we use for our other clients you will forgo any benefit from savings on execution costs that we might have obtained through our negotiation of volume

discounts or batched orders. In directing the use of a particular broker-dealer, it should be understood that we will not have authority to negotiate commissions or obtain volume discounts and best execution may not be achieved. You might incur higher commissions, other transactions costs, greater spreads, or receive less favorable net prices, on transactions for your account than would otherwise be the case had you used a broker-dealer we prefer.

Fidelity Investments \$0 Commissions Program

Compak recommends that all clients enroll in Fidelity Investments' \$0 Commissions Program to avoid or reduce trading fees paid by the client. Fidelity currently requires that custodial statements and trade confirmations be delivered electronically to participate in the program. If the client chooses to receive statements and trade confirmation via postal mail, they may not be eligible for the \$0 commissions program, which will result in higher trading costs and will have a negative impact on account performance.

Aggregated Orders

When we decide to purchase or sell a specific security for multiple clients at the same time, we will consider aggregating, or combining the orders. This procedure will result in a single average price for all client transactions in the aggregated order. The account custodian charges for each transaction as if it were placed individually.

Fixed Income Orders

If Compak Asset Management transacts a bond with a 3rd party, either for an individual client or as an aggregate order (block order), the custodian may charge a "trade-away" transaction fee, typically \$20. If the transaction is part of an aggregated order, the account custodian charges the transaction fee individually.

Structured Notes Orders

If Compak Asset Management transacts a structured note with a 3rd party, either for an individual client or as an aggregate order, the custodian may charge a "trade-away" transaction fee, typically \$20. If the transaction is part of an aggregated order, the account custodian charges the transaction fee individually.

Allocation of Thinly Traded Securities

Compak Asset Management will allocate securities among accounts when enough of a particular security or securities cannot be purchased or sold on a given day at a desired price. In this event, we will allocate the shares actually purchased or sold on pro rata basis. We may remove small allocations from the process if we believe it would not be in the best interest of our client(s).

Trade Error Policy – Alternate Using Error Account

From time-to-time we may make an error in submitting a trade order on your behalf. When this occurs, we might place a correcting trade with the broker-dealer which has custody of your account when we feel it is in your best interest. If an investment gain results from the

correcting trade, the gain will be placed in our account. If a loss occurs, we will pay for the loss from our own funds. Generally, if related trade errors result in both gains and losses in your account, they will be netted.

Review of Accounts (Item 13)

This section of the brochure describes how often client accounts are reviewed and by whom.

Reviews

The Investment Committee (IC) reviews the individual security investments held by Compak Asset Management's managed accounts on a regular and ongoing basis. Managed investment advisory accounts are assigned to one or more Investment Advisors Representatives of Compak who review the accounts on an ongoing basis at the direction of the Investment Committee to see that the accounts continue to conform to the investment strategy selected by the client in an effort to reach the client's goals. The Investment Committee continues to direct the strategies that are applied to client's accounts through the ongoing review of the Investment Advisors Representatives.

Financial plans are reviewed only upon request unless you retain us to update the plan on a continuous basis.

Reports

We have arranged for your independent qualified account custodian, typically Fidelity InstitutionalSM ("Fidelity"), which provides clearing, custody, or other brokerages services to Compak through National Financial Services LLC (NFS) or Fidelity Brokerage Services LLC, Members NYSE, SIPC., to prepare and distribute account statements directly to you. These account statements describe all activity in your accounts including account holdings, transactions, and investment advisory fees deducted from the account.

Client Referrals and Other Compensation (Item 14)

This section of the brochure discloses our arrangements with people who are compensated for referring us business.

Referral Relationships

Participation in Fidelity Wealth Advisor Solutions®.

Compak participates in the Fidelity Wealth Advisor Solutions® Program (the "WAS Program"), through which Compak receives referrals from Strategic Advisers LLC (Strategic Advisers), a registered investment adviser and Fidelity Investments company. Compak is independent and not affiliated with Strategic Advisers or any Fidelity Investments company. Strategic Advisers does not supervise or control Compak, and Strategic Advisers has no responsibility or oversight for Compak's provision of investment management or other advisory services.

Under the WAS Program, Strategic Advisers acts as a solicitor for Compak, and Compak pays referral fees to Strategic Advisers for each referral received based on Compak's assets under management attributable to each client referred by Strategic Advisers or members of each client's household. The WAS Program is designed to help investors find an independent investment advisor, and any referral from Strategic Advisers to Compak does not constitute a recommendation by Strategic Advisers of Compak's particular investment management services or strategies. More specifically, Compak pays the following amounts to Strategic Advisers for referrals: the sum of (i) an annual percentage of 0.10% of any and all assets in client accounts where such assets are identified as "fixed income" assets by Strategic Advisers and (ii) an annual percentage of 0.25% of all other assets held in client accounts. In addition, Compak has agreed to pay Strategic Advisers an annual program fee of \$50,000 to participate in the WAS Program. These referral fees are paid by Compak and not the client.

To receive referrals from the WAS Program, Compak must meet certain minimum participation criteria, but Advisor has been selected for participation in the WAS Program as a result of its other business relationships with Strategic Advisers and its affiliates, including Fidelity Brokerage Services, LLC ("FBS"). As a result of its participation in the WAS Program, Compak has a conflict of interest with respect to its decision to use certain affiliates of Strategic Advisers, including FBS, for execution, custody and clearing for certain client accounts, and Advisor could have an incentive to suggest the use of FBS and its affiliates to its advisory clients, whether or not those clients were referred to Compak as part of the WAS Program.

Under an agreement with Strategic Advisers, Compak has agreed that Advisor will not charge clients more than the standard range of advisory fees disclosed in its Form ADV 2A Brochure to cover solicitation fees paid to Strategic Advisers as part of the WAS Program. Pursuant to these arrangements, Compak has agreed not to solicit clients to transfer their brokerage accounts from affiliates of Strategic Advisers or establish brokerage accounts at other custodians for referred clients other than when Compak's fiduciary duties would so require, and Advisor has agreed to pay Strategic Advisers a one-time fee equal to 0.75% of the assets in a client account that is transferred from Strategic Advisers' affiliates to another custodian; therefore, Compak has an incentive to suggest that referred clients and their household members maintain custody of their accounts with affiliates of Strategic Advisers. However, participation in the WAS Program does not limit Compak's duty to select brokers on the basis of best execution.

Fidelity Wealth Advisor Solutions® (WAS) is provided by Fidelity Personal and Workplace Advisors (FPWA), a registered investment adviser and a Fidelity Investments company. WAS is designed to provide information regarding participating investment advisors to certain customers of Fidelity Investments. Participating investment advisors pay FPWA a referral fee, as detailed in the Participation Agreement between FPWA and each advisor.

Effective March 31, 2025, Fidelity Personal and Workplace Advisors LLC (FPWA) will merge into Strategic Advisers LLC (Strategic Advisers). Any services provided or benefits received by FPWA as described above will, as of March 31, 2025, be provided and/or

received by Strategic Advisers. FPWA and Strategic Advisers are Fidelity Investments companies.

Custody (Item 15)

This section of the brochure encourages you to check the statements sent to you by your account custodian to ensure the accuracy of the fee calculation.

You have authorized us to deduct periodic investment advisory fees directly from one or more of your accounts managed by Compak Asset Management. These deductions from your account are shown on the periodic statements sent by your qualified custodian directly to you. Compak is deemed to have limited custody of client assets because it is authorized to deduct advisory fees directly from client accounts. Client assets are maintained with a qualified custodian, and clients receive account statements directly from the custodian. Clients are encouraged to carefully review those statements and compare them with any reports received from Compak.

Investment Discretion (Item 16)

This section of the brochure discloses the power we have to make trades in your account.

You grant Compak Asset Management a limited power of attorney to select, purchase, or sell securities without obtaining your specific consent within the account(s) you have under our management. The limited powers of attorney are granted in the written Investment Advisory Agreement entered into between us. There are no restrictions upon the securities that may be purchased, sold, or held in your account unless you provide these restrictions to us in writing.

Voting Client Securities (Item 17)

This section of the brochure explains our proxy voting policy and your ability to get proxy voting information from us.

Compak Asset Management does not vote proxies for securities held in your investment account. Your account custodian or transfer agent will send proxy statements directly to you.

Financial Information (Item 18)

This section of the brochure is where investment advisors that collect more than \$1200 in fees per client and six months or more in advance would include a balance sheet.

Compak Asset Management is not aware of any circumstance that is reasonably likely to impair our ability to meet contractual commitments to you or our other clients. We do not

require pre-payment of investment advisory fees of greater than \$1200, more than six months in advance.

The Satisfaction Guarantee described in Items 4 and 8 of this document creates a potential obligation to refund fees to clients in their first twelve months with Compak. We do not believe that this potential obligation will be material to our ongoing operations or ability to meet our financial commitments. To address this potential risk, we will monitor the size of the potential obligation on a quarterly basis and record a contingent liability in the accounting books and records of the company. If in our opinion the size or likelihood of the potential obligation becomes material in size, we will fund a risk reserve account.

Privacy Statement

We, like other professionals who advise on personal financial matters, are required by federal law to inform our clients of their policies regarding the privacy of client information.

At Compak, we understand our obligation to keep information about you secure and confidential. We will inform you of our policies for collecting, using, securing, and sharing personally identifiable and/or nonpublic personal information ("Customer Information") the first time we do business and every year that you remain a customer with us.

Therefore, we maintain the following principles with respect to protecting your privacy:

- We are committed to protecting your privacy at all times;
- We do not sell or disclose any nonpublic personal information about you to anyone except as permitted by law or with your consent;
- We do not provide customer information to persons or organizations outside the affiliated companies who are doing business on our behalf, for their own marketing purposes;
- We contractually require any person and/or organization providing products or services to customers on our behalf to protect the confidentiality of our customer information;
- We afford prospective and former customers of the same protections as existing customers with respect to the use of personal information;

Information We Collect

We collect and use various types of information we believe is necessary to administer our business, and to offer you the best possible customer service. Customer information we collect is categorized into the following types:

- Information we receive from you on applications, or on other forms, through telephone, in-person interviews, or online forms, such as your name, address, phone number, social security number, e-mail address, IP address, biometric information, your assets, liabilities, income and other household information;

- Information about your transactions and account experience with us or others, such as your account balance, transaction history;
- Information from consumer reporting agencies, such as information regarding your creditworthiness or credit history;
- Information from visitors to our website provided through online forms, site visitor data and online information collecting devices such as "cookies."
- Other general information we obtain about you that is not assembled for the purpose of opening an account or offering certain products or services that you may request, such as demographic information.

Information We Share

The information we share helps us bring you greater convenience and more choices as a customer. We limit who receives Customer Information and what type of information is shared. Unless you tell us not to, we may share all five types of Customer Information among ourselves and with other third-party financial services companies as part of the ordinary course of providing financial products and services to you, for the purposes of offering you new products and services to address your financial needs, for product development purposes, and as otherwise required or permitted by law.

Such third party financial services companies may include other financial service providers such as brokerage firms, investment adviser firms, insurance companies and payment processing companies; and may also include non-financial companies such as check printing, data processing companies, and non-affiliated companies that provide us with Internet based tools and services that assist us in providing services to you such as financial planning. These companies might assist us, for example, in fulfilling your service request, processing your transaction, mailing account statements, or providing financial planning analysis and advisory services.

In addition, we may share any of the five types of Customer Information with companies that work for us to provide marketing and other services or other financial institutions or vendors with which we have joint marketing agreements. All of these companies that are acting on our behalf, are contractually obligated to keep the information that we provide to them confidential, and use the information only to provide the services we've asked them to perform.

Limitations to Sharing Customer Information

You can limit information shared about you. If you do not want us to share information from your applications, consumer reports or from other outside sources, please tell us of this request by notifying us through one of the following methods:

- Writing or call:
Compak Asset Management
1801 Dove Street
Newport Beach, CA 92660
(949) 679-2500

Please note that this request will apply to customer application information, consumer reporting agencies and/or other outside sources only and may take up to 30 days to be fully effective. Through the normal course of doing business, including servicing your accounts and better serving your financial needs, we will continue to share transaction and account experience information, as well as other general information among our affiliated companies.

Disclosing information in other situations

Under certain circumstances, we may be required by law to disclose your personal information. We may also disclose personal information to protect our legal rights, enforce our Customer Agreement, or to explain our actions to professional organizations that we or our employees belong to. We may disclose certain Customer Information to credit bureaus and similar organizations, and otherwise when permitted by law. For example, this may include:

- A disclosure in connection with a subpoena or similar legal process;
- A fraud investigation;
- Recording of deeds of trust and mortgages in public records;
- An audit or examination;
- The sale of your account to another financial institution.

Keeping up-to-date with our Privacy Policy

We will provide notice of our privacy policy annually, as long as you maintain an ongoing relationship with us. If, at any time in the future, it is necessary to disclose any of your nonpublic personal information in a way that is inconsistent with this policy, we will give you advance notice of the proposed change so that you may have the opportunity to opt out of such disclosure. Additionally, since this policy may change from time to time, you can always review our current policy by contacting us for a copy at: (949) 679-2500 or visiting our website at www.compak.com

Compak Affiliated Companies

Affiliates to whom we may disclose personal information about you may be categorized in several different businesses, including securities and insurance. The following is a list, as of the date of this brochure, of all companies affiliated with Compak to which this policy applies:

Affiliated Entities

- Compak Asset Management
- Compak Securities, Inc.

Non-Affiliated Brokerages, Fund Distributors, and Investment Firms

- Fidelity Investments

Information Security

We are committed to preventing others from authorizing access to your customer information, and we maintain procedures and technology designed for this purpose. We

take several steps to protect the customer information we have about you, including the following:

- We maintain physical, electronic and procedural safeguards to protect your information;
- We restrict access to information about you to those employees who need to know that information to provide you with the best possible products and services;
- We require outside companies and independent contractors to whom we provide customer information for marketing, servicing or processing purposes to enter into a confidentiality agreement that restricts the use of such information to be used for specific purposes as intended, and prohibits the independent use of such information;
- We update and test our technology on a regular basis in order to improve the protection of customer information;
- We have internal procedures that limit access to customer information to only those members who are considered "authorized" personnel.

Important Information about Procedures for Opening and Servicing an Account

To help the government fight the funding of terrorism and money laundering activities, Federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account.

What this means for you: When you open an account, we will ask for your name, address, date of birth and other information that will allow us to identify you. We may also ask to see your driver's license or other identifying documents.

If you have any questions about your personal or account information or about our privacy policies and practices, please feel free to contact us at (949) 679-2500.

Form ADV Part 2B Brochure Supplement

Moez Ansari

Compak Asset Management, Inc.
1801 Dove Street
Newport Beach, CA 92660
Telephone: 800-388-9700
E-mail: investments@compak.com
Website: www.compak.com
Brochure last updated: January 23, 2026

This Brochure Supplement provides information about Moez “Moe” Ul-Haq Ansari that supplements the Compak Asset Management, Inc. Brochure. You should have received a copy of that Brochure. Please contact Moe, President, if you did not receive the Compak Asset Management, Inc. Brochure or if you have any questions about the contents of this supplement. Additional information about Moe Ansari is available on the SEC’s website at www.adviserinfo.sec.gov.

Educational Background and Business Experience

Moe attended Fullerton College 1974 to 1976 and West Coast University 1977 to 1978.

Business Experience:

- Compak Asset Management, Inc., 1999 to present, President, Chief Investment Officer, and Investment Advisor Representative
- Compak Securities, Inc., 2002 to present, President, General Securities Principal, and Registered Representative
- Multiple Financial Services, Inc., 2003, Registered Representative
- Triad Advisors, Inc., 2001 to 2004, Registered Representative
- Sentra Securities Corporation, 1999 to 2001, Registered Representative

Disciplinary Information

Moe Ansari has not been involved in any civil or criminal investment-related events that must be disclosed by an SEC Registered Investment Advisor Representative in this document.

However, state regulators require that all formal investigations and disciplinary actions taken by regulators, customer disputes, certain criminal charges and/or convictions, as well as any IAR’s financial disclosures, such as bankruptcies and unpaid judgments or liens, be filed with FINRA. If this type of information would be material to your decision to do business with Compak Asset Management, Inc. please refer to SEC’s website at www.adviserinfo.sec.gov for more information about the Moe Ansari.

Other Business Activities

We want you to know that there are certain entities with which Moe Ansari has relationships that may give rise to conflicts of interest, or the appearance of conflicts of

interest. These entities, which are affiliated through common ownership and control with Compak Asset Management, Inc. include the following:

- Compak Securities, Inc.

Moe Ansari may provide advice about matters other than securities. He may also act as an insurance agent. As an insurance agent, he will receive compensation based upon whether or not, and in what amount, clients purchase insurance products through him.

Moe Ansari hosts a one hour “Market Wrap” talk radio/podcast show for a total of twenty (20) hours per month. The talk show is recorded live at the offices of Compak Asset Management, Inc.

Additional Compensation

Moe Ansari’s compensation comes primarily from Compak Asset Management, Inc. and is in part based upon the number of clients and size of accounts that he provides services to. He does not receive compensation from non-clients for providing advisory services.

Mr. Ansari, while acting as a Registered Representative of a broker-dealer may receive trailing 12b-1 distribution fees and other sales commissions from investment companies and product sponsors in connection with the placement of client funds in certain securities.

Mr. Ansari is also licensed as an insurance agent. As an insurance agent he will receive compensation usually based upon the size (premium amount) and/or type of insurance product. Because the commission compensation varies between investment options, Mr. Ansari has a financial incentive to recommend one insurance product over another. This financial incentive creates a potential conflict of interest between you, Moe and Compak Asset Management, Inc.

Supervision

Compak Asset Management, Inc. supervises its investment advisor representatives through a system of internal control procedures overseen by our Chief Compliance Officer, Feroz Ansari. This oversight includes review of client portfolios, investment advisor representative personal securities transactions, and correspondence. You can reach him at 800-388-9700

Form ADV Part 2B Brochure Supplement

Feroz Ansari, CFP®

Compak Asset Management, Inc.
1801 Dove Street
Newport Beach, CA 92660
Telephone: 800-388-9700

Website: www.compak.com
Brochure last updated: January 23, 2026

This Brochure Supplement provides information about Feroz Ul-Haq Ansari that supplements the Compak Asset Management, Inc. Brochure. You should have received a copy of that Brochure. Please contact Moe Ansari, President if you did not receive the Compak Asset Management, Inc. Brochure or if you have any questions about the contents of this supplement. Additional information about Feroz Ansari is available on the SEC's website at www.adviserinfo.sec.gov.

Educational Background and Business Experience

Feroz Ansari holds a Masters of International Management degree from Thunderbird, the American Graduate School of International Management in Arizona in 1993 and a Masters in Business Administration from the Institute of Business Administration at the University of Karachi in Pakistan in 1992. Mr. Ansari has completed risk management, trading, portfolio management, leadership, and financial management programs at Oxford University, INSEAD in France, Citibank Training Center in Singapore, Euromoney in New York, and Emirates Bank Training Center in Dubai. He serves on the Advisory Board of University of California-Irvine's Center for Investment and Wealth Management (CIWM).

Feroz Ansari is a CFP® (Certified Financial Planner). The CFP designation is issued by the Certified Financial Planner Board of Standards, Inc. A CFP candidate must have a bachelor's degree or higher from an accredited college or university, and 3 years full-time personal financial planning experience. The candidate must complete a CFP-board registered program or hold one of the following: CPA, ChFC, CLU, CFA, Ph.D. in business or economics, Doctor of Business Administration or an Attorney's License. CFP candidates must pass the CFP Certification Examinations. To maintain the designation he must attend at least 30 hours of continuing education every two years.

Business Experience:

- Compak Asset Management, Inc., 1999 to present, Senior Principal, and Portfolio Manager, and Investment Advisor Representative
- Compak Securities, Inc., 2002 to present, Owner, General Securities Principal, and Registered Representative
- University of California, Irvine, 2019 to present, Lecturer - UCI School of Business
- Emirates Bank, 1996 to 2002, Deputy General Manager
- Faysal Bank, 1995 to 1996, Treasurer

Disciplinary Information

Registered investment advisers are required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of each supervised person providing investment advice. Feroz has no legal or disciplinary events related to the financial services industry.

Other Business Activities

We want you to know that there are certain entities with which Feroz Ansari has relationships that may give rise to conflicts of interest, or the appearance of conflicts of interest. These entities, which are affiliated through common ownership and control with Compak Asset Management, Inc. include the following:

- Compak Securities, Inc.

Feroz Ansari may provide advice about matters other than securities. He may also act as an insurance agent. As an insurance agent, he will receive compensation based upon whether or not, and in what amount, clients purchase insurance products through him.

Feroz Ansari is a Lecturer at the University of California, Irvine School of Business. He teaches college courses and spends approximately 20 hours per month as a Lecturer.

Additional Compensation

Feroz Ansari's compensation comes primarily from Compak Asset Management, Inc. and is in part based upon the number of clients and size of accounts that he provides services to. He does not receive compensation from non-clients for providing advisory services.

Mr. Ansari, while acting as a Registered Representative of a broker-dealer may receive trailing 12b-1 distribution fees and other sales commissions from investment companies and product sponsors in connection with the placement of client funds in certain securities.

Disciplinary Information

Registered investment advisers are required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of each supervised person providing investment advice. Melissa has no legal or disciplinary events related to the financial services industry.

Other Business Activities

We want you to know that there are certain entities with which Melissa Wright has relationships that may give rise to conflicts of interest, or the appearance of conflicts of interest. These entities, which are affiliated through common ownership and control with Compak Asset Management, Inc. include the following:

- Compak Securities, Inc.

Melissa Wright may provide advice about matters other than securities. She may also act as an insurance agent. As an insurance agent, she will receive compensation based upon whether or not, and in what amount, clients purchase insurance products through her.

Additional Compensation

Melissa Wright's compensation comes primarily from Compak Asset Management, Inc. and is in part based upon the number of clients and size of accounts that she provides services to. She does not receive compensation from non-clients for providing advisory services.

Melissa Wright, while acting as a Registered Representative of a broker-dealer may receive trailing 12b-1 distribution fees and other sales commissions from investment companies and product sponsors in connection with the placement of client funds in certain securities.

Melissa Wright is also licensed as an insurance agent. As an insurance agent she will receive compensation usually based upon the size (premium amount) and/or type of insurance product. Because the commission compensation varies between investment options, Ms. Wright has a financial incentive to recommend one insurance product over another. This financial incentive creates a potential conflict of interest between you, Melissa and Compak Asset Management, Inc.

Supervision

Compak Asset Management, Inc. supervises its investment advisor representatives through a system of internal control procedures overseen by our Chief Compliance Officer, Feroz Ansari. This oversight includes review of client portfolios, investment advisor representative personal securities transactions, and correspondence. You can reach him at 800-388-9700

Compak Privacy Policy / Continuity Plan

At Compak Asset Management, Inc. ("CAM") and Compak Securities, Inc. ("CSI"), we understand our obligation to keep information about you secure and confidential. We will inform you of our policies for collecting, using, securing, and sharing personally identifiable and/or nonpublic personal information ("Customer Information") the first time we do business and every year that you remain a customer with us. Therefore, we maintain the following principles with respect to protecting your privacy:

- We are committed to protecting your privacy at all times;
- We do not sell or disclose any nonpublic personal information about you to anyone except as permitted by law or with your consent;
- We do not provide customer information to persons or organizations outside the affiliated companies who are doing business on our behalf, for their own marketing purposes;
- We contractually require any person and/or organization providing products or services to customers on our behalf to protect the confidentiality of our customer information;
- We afford prospective and former customers of the same protections as existing customers with respect to the use of personal information;

Information We Collect

We collect and use various types of information we believe is necessary to administer our business, and to offer you the best possible customer service. Customer information we collect is categorized into the following types:

- Information we receive from you on applications, or on other forms, through telephone, in-person interviews, or online forms, such as your name, address, phone number, social security number, e-mail address, IP address, biometric information, your assets, liabilities, income and other household information;
- Information about your transactions and account experience with us or others, such as your account balance, transaction history;
- Information from consumer reporting agencies, such as information regarding your creditworthiness or credit history;
- Information from visitors to our website provided through online forms, site visitor data and online information collecting devices such as "cookies."
- Other general information we obtain about you that is not assembled for the purpose of opening an account or offering certain products or services that you may request, such as demographic information.

Information We Share

The information we share helps us bring you greater convenience and more choices as a customer. We limit who receives Customer Information and what type of information is shared. Unless you tell us not to, we may share all five types of Customer Information among ourselves and with other third-party financial services companies as part of the ordinary course of providing financial products and services to you, for the purposes of offering you new products and services to address your financial needs, for product development purposes, and as otherwise required or permitted by law.

Such third party financial services companies may include other financial service providers such as brokerage firms, investment adviser firms, insurance companies and payment processing companies; and may also include non-financial companies such as check printing, data processing companies, and non-affiliated companies that provide us with Internet based tools and services that assist us in providing services to you such as financial planning. These companies might assist us, for example, in fulfilling your service request, processing your transaction, mailing account statements, or providing financial planning analysis and advisory services.

For a list of companies affiliated with CAM and CSI please see below. In addition, we may share any of the five types of Customer Information with companies that work for us to provide marketing and other services or other financial institutions or vendors with which we have joint marketing agreements. All of these companies that are acting on our behalf, are contractually obligated to keep the information that we provide to them confidential, and use the information only to provide the services we've asked them to perform.

Limitations to Sharing Customer Information

You can limit information shared about you. If you do not want us to share information from your applications, consumer reports or from other outside sources, please tell us of this request by notifying us through one of the following methods:

- **Write or Call:**

Compak
1801 Dove Street
Newport Beach, CA
(949) 679-2500

Please note that this request will apply to customer application information, consumer reporting agencies and/or other outside sources only and may take up to 30 days to be fully effective. Through the normal course of doing business, including servicing your accounts and better serving your financial needs, we will continue to share transaction and account experience information, as well as other general information among our affiliated companies.

Disclosing information in other situations

Under certain circumstances, we may be required by law to disclose your personal information. We may also disclose personal information to protect our legal rights, enforce our Customer Agreement, or to explain our actions to professional organizations that we or our employees belong to. We may disclose certain Customer Information to credit bureaus and similar organizations, and otherwise when permitted by law. For example, this may include:

- A disclosure in connection with a subpoena or similar legal process;
- A fraud investigation;
- Recording of deeds of trust and mortgages in public records;
- An audit or examination;
- The sale of your account to another financial institution.

Keeping up-to-date with our Privacy Policy

We will provide notice of our privacy policy annually, as long as you maintain an ongoing relationship with us. If, at any time in the future, it is necessary to disclose any of your nonpublic personal information in a way that is inconsistent with this policy, we will give you advance notice of the proposed change so that you may have the opportunity to opt out of such disclosure. Additionally, since this policy may change from time to time, you can always review our current policy by contacting us for a copy at: (949) 679-2500 or visiting our website at www.compak.com

CAM & CSI Affiliated Companies

Affiliates to whom we may disclose personal information about you may be categorized in several different businesses, including securities and insurance. The following is a list, as of January 23, 2026, of all companies affiliated with CAM and CSI to which this policy applies:

Affiliated Entities

- Compak Asset Management
- Compak Securities, Inc.

Non-Affiliated Brokerages, Fund Distributors, and Investment Firms

- Fidelity Investments

Electronic Document & Signature Provider

- DocuSign

Information Security

We are committed to preventing others from authorizing access to your customer information, and we maintain procedures and technology designed for this purpose. We take several steps to protect the customer information we have about you, including the following:

- We maintain policies and procedures designed to protect Customer Information and prevent unauthorized access, use, or disclosure, consistent with Regulation S-P and FINRA requirements. This program includes administrative, technical, and physical safeguards appropriate to CAM & CSI size, complexity, and the nature of its activities;
- We maintain physical, electronic and procedural safeguards to protect your information;
- We restrict access to information about you to those employees who need to know that information to provide you with the best possible products and services;
- We require outside companies and independent contractors to whom we provide customer information for marketing, servicing or processing purposes to enter into a confidentiality agreement that restricts the use of such information to be used for specific purposes as intended, and prohibits the independent use of such information. We conduct reasonable due diligence on service providers that may access Customer Information and requires such providers, by contract, to implement appropriate safeguards and confidentiality protections;
- We update and test our technology on a regular basis in order to improve the protection of customer information; We periodically review and evaluate our privacy and information security controls to address changes in risks, business operations, and regulatory requirements;
- We have internal procedures that limit access to customer information to only those members who are considered "authorized" personnel.

Incident Response and Notification

We maintain written incident response procedures designed to address unauthorized access to or use of Customer Information. In the event of a data security incident involving Customer Information, we will provide notifications to affected individuals and regulators as required by applicable law.

FINRA Public Disclosure Information

FINRA Conduct Rule 2280, requires the following information to be provided to you: (1) The FINRA Regulation, Inc. Public Disclosure Program hotline number is 1-800-289-9999; (2) The FINRA Website address is, www.FINRA.org, and (3) The FINRA has a brochure available describing the public disclosure program.

Securities Investor Protection Corporation ("SIPC")

You may obtain information about the SIPC, including the SIPC brochure, by contacting them directly at (202) 371-8300 or visiting their website at www.sipc.org.

Important Information about Procedures for Opening and Servicing an Account

To help the government fight the funding of terrorism and money laundering activities, Federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account.

What this means for you: When you open an account, we will ask for your name, address, date of birth and other information that will allow us to identify you. We may also ask to see your driver's license or other identifying

For more information about Compak's services, please request a copy of Compak's Form CRS (Client Relationship Summary) brochure. Form CRS brochure can also be found here: www.compak.com/formcrs

For more detailed information about advisory services, please request a copy of CAM's Form ADV Part 2A brochure. CAM's brochure can also be found here: www.compak.com/formadv2

If you have any questions about your personal or account information or about our privacy policies and practices, please feel free to contact us at (949) 679-2500.

Compak Business Continuity Plan Disclosure

Recognizing the importance of minimizing disruptions to our operations and services, Compak has developed and maintains written business continuity and disaster recovery plans (“BCP”). These plans are designed to address reasonably foreseeable events that could disrupt business operations, including, but not limited to, fires, power outages, evacuations, severe weather, acts of terrorism, cyber incidents, and other significant business disruptions.

Our business continuity planning is designed to achieve the following objectives:

1. Mitigate risks within our control through preventative and protective measures;
2. Maintain continuity of critical business operations and client services, to the extent practicable, during a disruption; and
3. Facilitate timely recovery and resumption of operations and data, with minimal interruption, based on the nature and scope of the disruption.

Based on an enterprise-wide assessment of financial, operational, and technological risks, our business continuity and disaster recovery plans include, among other things:

- Backup and recovery processes for mission-critical systems and data;
- Alternate methods for communicating with customers, including rerouting of critical telephone numbers where appropriate;
- Alternate physical locations and remote work arrangements for essential personnel;
- Contingency access procedures for technology, data, and telecommunications systems; and
- Procedures for notifying customers in the event of a material service disruption, including information regarding the nature of the disruption, expected duration (where known), and how to contact Compak for assistance.

In most circumstances, service disruptions should not affect your ability to access your account or withdraw available funds. However, certain disruptions—particularly those involving third-party service providers, market closures, or events beyond our control—may limit or delay the ability to execute securities transactions.

Our business continuity and disaster recovery plans are reviewed, tested, and updated periodically to account for changes in business operations, technology, regulatory requirements, and physical facilities. This disclosure will be updated if there are material changes to our business continuity approach. A current copy of this notice is available at www.compak.com or by contacting a Compak representative.
